BLUE RIBBON QUALITY SEEDS

EVERY POUND **GUARANTEED TO GROW**

J. F. SINN
President Berry
Seed Co.

A farmer by birth
and early training.
Connected with
our Company for
over 25 years.

Recognized as
one of the fore-
most men in the
seed business.
He makes it his
business to see
that you get
more seed
value for your
money.

He is always
at your ser-
vice, and
glad to help.

I want to impress upon everyone receiving this Blue Ribbon Sale Catalog, that it carries the biggest bargains and the lowest prices ever made in the history of our business.

I know that the farmers are short of money and our prices must be the lowest and our values the best, if we do business with them. This fact explains why we have cut our prices to the limit and have sacrificed our profits at every turn. No one is attempting to meet our prices when quality and service are both considered.

I want you to know that we have 37 years of successful experience in the seed business. When you buy from the Berry Seed Company you are dealing with an old established seed firm, and one that has always given the strongest guarantee and has a reputation of living up to it and making good.

I am going to give you 60 days to satisfy yourself on the quality and the fact you have saved money or it is no trade. I know that our values are outstanding and our bargains genuine money saving offers that are not duplicated.

Thousands of customers will bear me out in these statements as they have had the experience of getting better seeds and saving big money on their orders. I have printed a few of these letters where space would permit so you might be better convinced of these facts.

Again I want to urge you go buy your seeds early. Seed markets reached their low point in October. We bought heavily at that time and have a tremendous stock bought to unusual good advantage which permits these outstanding values. When our stocks are exhausted and we have to go into the markets and buy again, it may mean that we will have to ask considerably more money and we cannot guarantee to protect these extremely low prices indefinitely. So it will be only good business on your part to buy now. I will guarantee these prices to save you money and that you will be satisfied with the quality.

Seed crops are again short, the Red Clover and Alsike crops being almost a failure in many large producing states. Sweet Clover and Alfalfa are also far below average production. Timothy is a slightly larger crop than last year when it reached the highest prices known since 1920. In view of these short crops and vast areas of last spring's seedlings failing to make a stand, it is only natural to expect a big demand for all kinds of grass seed. The low prices will stimulate trade and with a heavy demand higher markets are inevitable. We have already had substantial advances and today's market would justify much higher prices than we are asking. So let me urge you again to buy now while these prices can be protected. Remember this is the only catalog we are issuing. You will find this book complete quoting our lowest prices on Garden, Flower, and Farm Seed, also Nursery and ornamental shrubbery. Use this catalog and make up your order. I will see that you are pleased and that you have saved money. I want you to start with us while our prices are lowest as your satisfaction will be greatest. Let me have your order and I will do the rest.

Yours faithfully,

J. F. Sinn

AMAZING SEED VALUES

LOWEST PRICES

DEPENDABLE QUALITY

LOWEST PRICES IN HISTORY

Even our old customers will be amazed at the low prices we have made in this Blue Ribbon Sale catalog. Never before have prices been so low. A gallon of cream, a case of eggs, or a hundred pounds of beef or pork will buy more farm seeds from us than they would buy last year. Our seed prices assuredly are lower. In many cases our prices are away below the lowest points in history.

A farmer who has not dealt with us before might quite naturally question these extremely low prices. You may ask what about quality? Is your firm reliable? Will I run a risk of noxious weed seeds or poor germination? Such questions are honest questions and you have a perfect right to want to know before you entrust your order to us.

How You Can Judge Our Reliability

Our business has been established 37 years. It began in a small way on a farm in Page County, Iowa. It has grown into the Largest Seed House in the world selling farm seeds direct to farmers. No firm could exist so long or grow so large if they were not reliable or if their seeds were of doubtful quality.

We have in all these years used Uncle Sam's mail service for building up our business. You have to be fair and honest, for you can't get by 37 years with crooked methods or misrepresentation.

On this page you will find a list of the banks with whom we do business. Among them are some of the largest and strongest banks in the country. They loan us money and their officers know us personally. They are conservative bankers who would not do business with any concern that was built on a foundation of sand. They know the Berry Seed Company is built on the rock of fair dealing.

On page 3 we tell you more about the cleaning, and testing of our seeds. We do not guess at the quality of our seeds. We can't afford to. The purity and germination of every lot is accurately determined and we tell you what it tests.

You take no chances when you buy from us. It is true that some firms are taking inferior seed and selling it at low prices. They evidently figure they can fool the farmer. Our policy is to give you the absolute limit in quality and value. Judge quality first and then you will find that we have matchless values and unbeatable prices. We will ship you the kind of seed you'll be satisfied with. One order from you now will mark the beginning of many years of pleasant business friendship between us.

Our old customers know this, and will doubly appreciate our amazing values even in this year of low prices.

\$850,000.00 Capital and Surplus

We mention our financial strength not to boast of our bigness, but just to let you know that we are reliable. When you trade with us you are not dealing with a small merchant who probably couldn't make good on a guarantee if he wanted to. Your order to us is entrusted to a long established firm that specializes in seeds. One that is able to back up with plenty of real hard money any statement or guarantee they make. It is because of financial strength that we can secure for you many of the astonishing bargains you will find in this book.

Banks That Back Us

Here is a list of the banks with whom we do business. Officials in these banks are personally acquainted with us. Anyone of these will tell you that we are reliable. Your own banker can refer to his credit rating books and he will tell you the same thing.

Continental Illinois Bank and Trust Company, Chicago, Ill.
First National Bank, Chicago, Ill.
Bank of Manhattan Trust Company, New York, N. Y.
Iowa-Des Moines National Bank, Des Moines, Ia.
Omaha National Bank, Omaha, Neb.
Central Mfg. Dist. Bank, Chicago, Ill.
Terminal National Bank, Chicago, Ill.
Citizens State Bank.
Page County State Bank.
Union Trust Company, Clarinda, Iowa.

GUARANTEE

We guarantee everything in this catalog to be as represented. We guarantee that our prices are lowest, considering quality. If upon receipt of your order you are not entirely satisfied you can return it and your money, plus transportation charges, will be promptly refunded. Or you can keep it 60 days and have the seed tested in order to satisfy yourself that the quality is good and that you have saved money and secured a big bargain. Then if you are not pleased you can return it, and have all money refunded. You must be satisfied and we guarantee to save you money.

We also guarantee to replace, free of charge, any garden or flower seed that fails to grow on account of poor germination. Our nursery stock is guaranteed to arrive in good live planting condition or it will be replaced free of charge.

Our guarantee protects the buyer and is lived up to so it means just what it says.

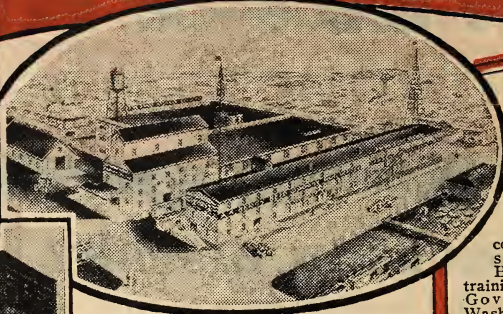

BERRY SEED CO.,
Clarinda, Iowa.

BERRY'S BLUE RIBBON REPUTATION IS BACK OF EVERY ORDER

Our reputation is really the good will of our customers. It is our most precious asset, because it is the very heart of our business. We guard this good will carefully by supplying tested seeds that we can back with an ironclad guarantee of satisfaction to the buyer.

LOWEST PRICES

from WORLD'S LARGEST SEED
HOUSE SELLING DIRECT to YOU!

Our Clarinda plant and main offices are shown above and our Chicago plant on the left. These large buildings, equipped with modern machinery, make possible our excellent service, high quality and low prices.

TESTED QUALITY

Mr. L. C. Jorgenson is one of the country's best seed analysts. He secured his training from U. S. Government at Washington, D. C.

Quick Service

Prompt Shipment. Quick Arrival

Our entire policy of business is to take care of every customer's order so he or she will be satisfied in every way. Both our Clarinda and Chicago plants are organized and equipped to get shipments out promptly. Freight service is improved and shipments roll to destination in short order. Thus even late buyers can get their seeds in plenty of time. You should remember, however, that it is not advisable to delay your orders this year. Prices are so low that advances are almost certain to occur later in the season.

We guarantee that all shipments will arrive safely and in good condition. If there is any sign of loss or damage just have your agent mark it on the freight bill, send the bill to us and we will promptly adjust the matter. Address all letters, orders and correspondence to Clarinda. We have no office at Chicago.

Service on Seeding Problems

Perhaps you may be undecided as to what you should sow. You may desire further information on some crops. Possibly you have a farming problem that is hard to solve. If so, write to us. We may be able to help you. Our secretary, Mr. Joe Faassen, has made quite a study of farm crops. He is always glad to help whenever he can. His services are at your disposal. Feel free to write at any time.

Recleaned Seed

It will pay you to fully understand that our scientifically recleaned and specially processed seed is distinctly a superior product. When some dealers talk about recleaned seed they mean it has been run over a fanning mill with a couple of screens in it. That will help, of course, but much greater care and attention must be given to the average seed to make it desirable to sow.

Thousands and thousands of farmers are sowing weed seeds of a noxious nature and don't know it. Frequently it comes from neighbors' farms and neither the buyer nor seller knows about it until later years bring them on in abundance.

In our cleaning plants we have some machines that are used just to get one particular kind of weed seed. Our equipment is modern, efficient, and we can do cleaning and special processing that is absolutely impossible for the average concern. You could afford to pay us a premium for such seed and still have much more economical and satisfactory seed. We do not charge you a premium, however, but give you scientifically recleaned seed at prices that are lower than many are asking for inferior quality. Judge seed by quality. Quality makes the value and our low prices make unbeatable bargains.

We Test to Know

The seed business is our only business, not a side line. We must ship good seed to our customers or our business will fail. We can't afford to guess at the quality of our seeds. We must KNOW.

Therefore, every lot of seed is tested with painstaking accuracy. The analysis shows us exactly what the seed is. The purity of the seed is known to one hundredth of one per cent. The germination is also found. The seed must be satisfactory or it isn't shipped.

We refuse to buy lots of seed because of some undesirable impurity or weak germination. Whoever sows such seed will regret it. You are always safe on our seeds and no matter what grade you buy you are guaranteed an excellent bargain. Every shipment we make has a tag on it showing purity and germination tests. You know what you've got because our tag gives you the facts.

CROPS and PROFITS**

DIRECT BUYING

The Sensible
Thing to Do

In these days when every penny counts it is well to reconsider some things we have long known. By the time that an article sold by the producer has reached the consumer there have been too many "fingers in the pie." Too many handlers; too many extra profits; too wide a spread between the producer and the consumer.

You Save Money on all Seeds

We eliminate extra profits. Our seed comes largely direct from the producing sections to our plant. From one section comes Red Clover, another Alfalfa, another Sudan, Sweet Clover, Timothy, Rape, etc. We reclean and assemble these stocks so that you can get at one place all the different kinds of seed you may need. All of this seed is scientifically cleaned, graded and tested. You get it in the way you want it and at a decided saving in price.

We have saved the American farmer thousands of dollars on our guaranteed quality seeds. We can save you good money this year. Join that mighty caravan of farmers that is turning this year to the World's Largest Seed House—selling farm seeds direct to farmers. Quality counts.

CUTS OFF
THE
MIDDLEMAN

AND
SAVES YOU
20% TO 30%

KEEP THIS EXTRA
PROFIT for YOURSELF

AN EXPLANATION of GRADES

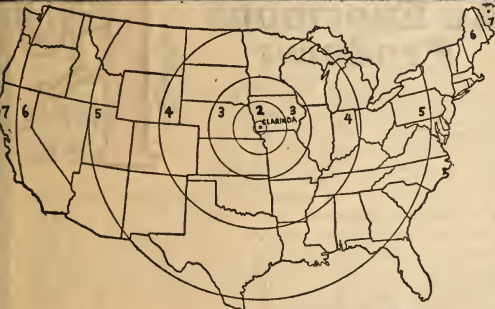

There are some lines of seeds that naturally fall into different grades. We do not mix these altogether in one lot but divide them into grades. Thus the farmer who does not object to a little off color or smaller berry has an opportunity to get such seed at a considerably lower price. On the other hand, the man who wants only the best that money can buy will find that our best or World Brand grade is better than that which is generally sold as the best.

World Brand. A strictly A No. 1 Extra Fancy quality. Biggest berries, highest color and in every way the nicest seed. It will fully satisfy the most critical buyer. It's the cream of the crop.

Dealers Fancy. A very good quality. Fully equal to what is quite generally sold as the best. High purity and germination. Nice color and good sized berries. Very satisfactory.

Planet Brand. A grade that pleases the average farmer. Good dependable seed that serves in a very satisfactory way. Berries a little smaller. Not quite so smooth looking but an excellent value for the price.

Star Brand. Our cheapest grade frequently demanded when sowing for fertilizer. Gives surprisingly satisfactory results, especially in Alfalfa and Sweet Clover.

Parcel Post Rates

Any package up to 70 lbs. in weight and not exceeding 100 inches in length and girth combined can be sent by parcel post. If you want anything shipped by parcel post that is not quoted post-paid be sure to remit to cover postage.

First find the zone you are in and then figure the amount of postage from the following table:

	1st Lb. Costs	All Additional Pounds
Zone 1	7c	1c
Zone 2	7c	1c
Zone 3	8c	2c
Zone 4	8c	2c
Zone 5	9c	4c
Zone 6	10c	8c

For example, a 10-lb. package to the 3rd zone costs 8c for the first pound and 2c a pound for the next nine pounds. 8 + 18 = 26c total. For short distances or for small packages parcel post is cheaper. Otherwise express. Freight, of course, is cheapest excepting on packages of 35 lbs. or less.

FREIGHT RATES are LOW

Transportation charges are not excessive, being in most cases only a fraction of a cent per pound. After adding freight to cost you will find our prices a big saving over local prices on the same quality of seeds. Clover and Grass seeds take the 3rd class rate. Grains take lower rates. The following table will give you a very good idea as to approximate freight charges to your station. We can give you exact rate to your station upon request.

HOW TO ORDER

It is easy to order by mail. Use our regular order blank form if you have one. If not, you can use any kind of paper or we will send you order blanks.

Give full name and complete address. Tell where you want the seed shipped to and whether to ship by freight, express or parcel post (see to left for postage rates). If your freight station is different from post office be sure to say so. In case there is no agent at your freight station, then include freight charges in your remittance or let us ship to the nearest station where there is an agent.

Figure up the cost of your order according to latest catalog or price list you have. If you want farm seeds shipped from Chicago remit Chicago prices as shown in catalog or price list.

Send your remittance with your order. You can send this in the form of a Postal or Express Money order, Bank draft or your own personal check on any going bank where you have funds to cover. Do not send stamps or coin when convenient to remit otherwise. We address registering letters containing currency.

Address all mail and orders to Clarinda. We have no office at Chicago. Write to Clarinda only. If you are in a big hurry for your seeds mark your order Rush.

LOT GRAND

Sudan Grass

LOWEST
Price in History\$1.50
PER BU.
50 LBS.NEW CROP
SEED

GROW IT THIS YEAR

A Most Profitable Crop

This valuable grass should be grown on every farm for summer pasture or extra hay crops. The price is so ridiculously low that all can well afford to sow it. Never before have you been able to buy the finest new crop re-cleaned seed at such a low figure. This is one of the greatest bargains in our Blue Ribbon Sale which is setting a new record for low prices.

Description

Sudan belongs to the cane family but is finer stemmed and a free stooler. Grows 4 to 7 feet high and yields 4 to 10 tons of cured hay per acre. Livestock is very fond of Sudan. It has good feeding value. First hay crop can be cut in about 60 days after seeding and second and third crops 30 to 40 days apart.

Sudan is one of the best drought resisters known and supplies an abundance of fine pasture or hay during the hot dry months of the summer when feed is often scarce. That's why every farm should have some of it. It has been a life saver to thousands during the past few years.

How to Handle

Sudan is a warm weather crop. Do not sow until corn planting time or after. Prepare a good seed bed as you would for corn. Drill in close rows or broadcast. Cover seed about an inch deep. Sow 20 to 25 lbs. per acre. You can begin pasturing when 6 to 8 inches high. Cut for hay when in bloom, although you can cut earlier or later without damage or loss.

An Extraordinary Bargain

Our price to you is less than the cost of production. The seed is all the very finest new crop. Some dealers carried over Sudan seed last year which will have lost considerable of its germinating power. You get double the value in our fine new seed. It has strong germination, high purity and is guaranteed free of Johnson Grass. We further guarantee that this is the lowest price at which you can buy this quality of seed.

When you sow Lot Grand you have the satisfaction of using the kind of seed that will give you the best assurance of success. It's easy to grow Sudan with this kind of seed.

We urge every one of our customers for the sake of better farm profits to start this year with this wonderful money maker. It produces enormous quantities of feed in a short time and it keeps right on the job, doing its best when heat and drought are killing your ordinary crops. Take advantage of an extraordinary bargain price by ordering now.

Rockwell City, Iowa.

Gentlemen: I have been a customer of yours for several years. Your Red Clover seed is a wonderful producer. Your Dakota No. 12 Alfalfa, both in price and quality, has given me the best of satisfaction.

Yours respectfully,
S. G. FOWLIE.

BILLION DOLLAR
GRASSAn Enormous
Producer\$1.40
PER BU.
35 LBS.

The popularity of this grass is ever on the increase. It is a variety of Millet also known as Japanese Millet. It is without doubt the heaviest producer of all millets, especially on rich moist soil. Grows 6 to 8 feet high. Produces as high as 26,000 to 50,000 lbs. of green feed per acre with seed production of 1,000 to 2,000 lbs. per acre.

Should not be sown until weather is warm, but will stand somewhat cooler growing conditions than Sudan. For that reason it is especially popular in the north, although it is grown throughout the entire country. Sow during May, June or July, using 20 lbs. per acre. Makes hay in 6 to 10 weeks.

Low Price for This Year

We are making this low price in face of a short seed crop this year. Have only a limited amount contracted to sell at this low price. Seed is all the best quality and guaranteed satisfactory. The fine feed value and heavy production of this crop make the crop in big demand. Order early to make sure of your supply.

It also can be used for pasture. May be mixed with Soy Beans or Cowpeas. If fed green start stock on it gradually. It is palatable and particularly valuable for dairy cattle, young stock and sheep.

**SEE PAGE

SOY BEANS

**Save by Buying
DIRECT**

A Fine Money Making Crop

It is truly amazing how soy beans have swept the country. Comparatively a few years ago they were an experiment. Now you see them everywhere. The farmer who loses out on a crop of clover no longer does without hay. He plants Soy Beans and harvests a heavy crop of fine hay in the fall. If small grain doesn't pay him he plants soy beans for a seed crop and harvests 20 to 30 bushels of beans per acre. In our part of Iowa farmers plant soy beans after the small grain is off and take another hay crop or plow under the stand for soil building. It's no wonder the crop is popular.

The Lowest Prices Ever Made

Now you can buy extra fine quality, graded, new crop beans at exceedingly low prices. Our Soy Bean Bargains appeal to all who appreciate the economy of high quality. All our stock is clean and bright. The small beans and the split ones are removed. It is a product greatly superior to what many sell. It is real seed stock and goes much further.

We are pricing our seed at the very lowest figures that such seed has ever sold for. About half what they sold for last year. Every variety is a bargain. See page 25 for money saving quotations.

How to Handle Soy Beans

Plant when weather and soil is warm, corn planting time or later. Prepare a fine clean seed bed. For hay broadcast or drill in close rows 1½ to 2 bushels per acre. For seed in 18 to 20 inches apart 30 to 40 lbs. per acre. Cultivate with a harrow while beans are small and dry. Cut for hay when beans are fairly well formed, but before leaves fall. Harvest for seed when beans are practically ripe.

Varieties

Dunfield. Pure yellow. Heavy seed producer and an excellent hay type. Stands up well. Does not shatter easily. Matures in about 105 days. Medium sized leaves and stems. An extra good all purpose variety.

Manchu. An old standby. Widely grown both for hay and seed crop. Color light yellow with dark seed scar. Stands up well. Adapted to a wide range of conditions. Fine for hogging down. 105 days.

Illini. Very popular. Grown for hay north of Central Iowa and for hay and seed south. Medium in stems, leaves and maturity. Grows erect. Color yellow. One of the most profitable varieties.

Wilson Black. A hay bean. Medium late. Small black seeded. Fine stemmed. Very nutritious. Very much in demand as a hay bean. 120 days.

Virginia Hay bean. Makes large growth with enormous yields of hay. One of the best beans for poor land. Seed brownish and smaller than the average. Requires less seed per acre.

COWPEAS

Quick maturing crop. Requires more warmth than Soy Beans. Grow on poor soils. Very good for sandy or light loam. Makes rich feed. Also good soil builders. All our seed stock is fine. See quotations page 25. Write for prices on large amounts. Can ship southern orders from St. Louis.

Varieties

Whippoorwill. Medium early in maturity, about 80 days. This is the most popular of all cowpea varieties and we have a big demand for them. They grow quite erect, which is a desirable characteristic and, no doubt, one of the reasons for its popularity. They are heavy producers and make a profitable kind to use. Seed is speckled brown in color. We recommend it highly.

New Era. If you wish the earliest of all varieties select this one. Good for northern states or where late planting is necessary. May be planted after small grain for plowing under. Good soil builder. Smaller seeded than Whippoorwill. Use 1½ bu. per acre for broadcast seeding.

Mixed Cowpeas. Somewhat cheaper than unmixed yet many prefer a mixture. Fine for pasture, hay or soil building. Very desirable unless pure seed crop is desired. All good reclaimed stock. We have a big call for mixed cowpeas.

CANADA FIELD PEAS

For early hay or green feed nothing equals Field Peas. Can be sown as early as land can be worked. Disc or harrow in 1 to 1½ bushels Peas with 2 bushels Oats. Cut for hay when oats are in the dough stage. Production is very heavy and feeding value very high. Also fine to plow under for soil enrichment. Crop very fattening. Increases milk production. Excellent for hogs. Solves the problem for early green feed as no other early crop can do.

Our seed is high quality, genuine Canada Field Peas. Crop short but our prices low. See page 25. If you are going to be short on feed next spring we recommend this crop very highly.

"Dear Sirs: I have bought seed from you for several years. I find them to be O. K. in every way. The quality and the germination is very satisfactory. Your seeds produce results. Also your prices are real money-saving quotations. I am well pleased. Yours truly,

Edwardsville, Ill.

H. C. STRASEN.

**LOWEST
PRICES****SEED
CORN****96%
GERMINATION****It Pays to Plant
Improved Seed**

You depend on corn for the biggest part of your income. It is your most important crop. The seed has a great influence on yield. You can well afford to spend money for seed as it is a small item. At the very low prices we have on improved and graded seed corn it means an expenditure of around 25c an acre. Surely your most important crop is worthy of that expense. Even with corn at low prices an increase of only one bushel per acre pays back that cost.

Why Our Seed Is Better

Our customers report increases in yields of 10 and 20 bushels per acre. That doesn't happen by chance. Our seed stock is of known heavy production under general farming conditions. The seed selection is from fully matured, well formed ears. It is quick high germinating stock. This seed is then shelled and graded and laboratory tested. Only half the stock we gather for seed finally gets in the seed we ship. It is real seed stock.

We do not breed for show corn but we strive to get the largest number of bushels of good sound merchantable corn per acre. You'll find plenty of show ears in your field next fall, but what will please you most is the heavy yield per acre.

The description of the different varieties here given will show you that we have corn for all sections. Medium late, medium early and extra early. We have seed corn for you and when you consider the quality of seed stock we offer you will agree that our price is very reasonable. See page 25.

CLARINDA BIG PERFECTION

This is the largest eared and heaviest producer of all our open field pollinated yellow varieties. A splendid sort. Just a little later than Pride of Iowa. Ears not quite so uniform, but larger. Big thick ears with large kernels. Deep golden color. Broad thick deep grains. Large strong germ. Vigorous grower. Maturity around 110 to 115 days. We don't believe there is another variety to equal it. It is being grown well up into Iowa and all points east and south. It sure is a dandy corn. If you want to show your neighbors how to grow a real crop of corn plant some Big Perfection.

BERRY'S IMPROVED REID'S DENT

A superior strain of a well known variety. Solid compact ears 9 to 13 inches long. Grains quite deep and set close. Straight rows well filled. A great improvement over the old Reids. Rich golden color. A small cob and shank. High feeding quality. Maturity around 100 to 110 days.

IMPROVED LEAMING

A good producer on all soils. A tried and tested variety for over a century. Well filled ears. Deep broad grains. Medium sized red cob. Shells out well. Often used for ensilage in northern states. Quite early. Matures in 110 to 120 days.

LEGAL TENDER

A pure yellow corn with deep grains and small red cob. Ears extra sized. Has yielded 90 bushels per acre for John Hess in Central Iowa. Produces exceptionally well. Abundant foliage. Excellent for forage. Easy to shuck. A variety that will please you. Around 110 days' maturity.

SEED CORN GUARANTEE

30 Days to test it—Your money back if not satisfied. 96% or better germination

We take great care in the selection and preparation of our seed corn. It is all tested and labeled when shipped. You have the privilege of examining it and retesting it in any way you wish. If you do not find it as represented, or if for any reason you are not satisfied you may return it, and your money plus transportation charges will be promptly refunded. We abide by your decision. There are no strings to this guarantee. We say what we mean and mean what we say. You must be satisfied.

BERRY SEED CO., CLARINDA, IOWA**PRIDE
OF
IOWA**

One of our heaviest producing yellow. A cross between Reids Dent and Legal Tender. Gives a larger ear than Reids without the tendency to become flinty. Grains deeper and wider than Reids but not quite so smooth. Rather a small cob. Has a heavy shelling percentage. Average maturity around 110 days. Small shank, easy to husk. Ears are well filled.

We have reason to be proud of our Pride of Iowa and you'll be proud of a field of it on your farm. Our shelled stock is A No. 1. If you want some ear corn in this kind we can supply something extra nice. See page 9.

Fairfax, Mo.
Oct. 26, 1931.

Dear Sirs:

Each year for 25 years I have bought seeds from the Berry Seed Company. I have found the quality of your seeds equal or superior and the price always lower than any I could obtain elsewhere. I also know you have some extra good seed corn.

Your customer,
FLOOD L. FELLOWS.

LARGER YIELDS

MAKE BERRY'S SEED CORN
A WISE INVESTMENT

Medium Early Yellow

Berry's Golden Dent. An early yellow dent, 90 to 100 days. Large ears for early variety. Fairly smooth. Well filled. Similar to Reid's Dent, but earlier. Sixteen to twenty rows. Much heavier yielder than Pride of the North. Medium height stout stocky stalks. This variety is easily a leader in its class.

Iowa Gold Mine. Another fine medium early variety. About a 100 day corn. Deep yellow grain, small cob. Always gives satisfactory results. Sold under various names by different seedsmen. Those wishing a medium early heavy yielding corn will make no mistake in selecting this variety.

EARLY YELLOW DENTS

Pride of the North. Especially recommended for northern customers and those wanting early feeding corn. Maturity about 90 days. One of the finest pure yellow early dents. Medium sized solid ears. Stands up well and yields surprisingly well.

Minnesota No. 13. Also in the 90-day class. Very popular; eight-inch ears, often two on a stalk. Stalks quite leaty. Does well even under unfavorable conditions. One of the best producers in its class. We always have a big demand for this.

Other Excellent Early Types

Yellow White Cap Dent. We recommend this highly. A 90 day type. Nice deep kernels. Sides medium yellow. Caps or tops of grains white. One of the finest early feeding varieties in existence. The kind you get enthusiastically about. Heavy producer of fine solid corn. You will be exceptionally well pleased with this one.

Golden Cap. Grains a cherry red color with yellow top or cap. Very fine appearing. Yields very heavy. Grain a little softer than the average. Ears well filled. Matures up to 100 days. One of the best early feeding corns you can plant. Great favorite with stock men. Adapted to most any section of the corn belt.

White Cap Red Dent. Similar in nearly every respect to Golden Cap except color of cap is lighter and a little earlier.

Up-to-Date Calico. This is the famous "speckled" corn that has been popular for so many years. A fine feeding variety. Various strains of Calico on the market. We consider this the best. Excellent yielder, good sized ears, medium deep grains. Matures in 100 days. We seldom have enough of this variety to fill demand.

SEED TREATMENT

Semesan Jr. or Merko

These are dry treatments that can be applied to seed corn anytime before planting. They give assurance against losses such as seedling blight and root and stalk rots. Increases germination, permits earlier planting and reduces seed decay. One pound treats 6 bushels. Price, 1 lb., \$1.75; 5 lbs., \$8.00, express paid. That means it costs only 4c an acre. It pays to use it. We consider either Merko or Semesan, Jr., equally satisfactory.

KRUG'S DENT

Ranks along with our Big Perfection and Pride of Iowa in yield, but is 10 to 15 days earlier. A four-year test in Illinois proved it the best yielder of 118 varieties. It is a cross of a smooth Reids Dent with Gold Mine. Ears somewhat smaller than Reids, but lots of them. Exceptionally firm and solid. Rich yellow color. Combines early maturity with heavy production. We recommend it highly. We do not believe there is another variety of equal earliness that will yield like our Krugs Dent. Our Hybrid is the only exception.

This scientific development in Corn is bringing heavy increases in yield. Tests in Iowa show increases of 25 bushels per acre. 10 to 15 bushels per acre increase can be readily expected under average conditions. Yielded 127 bushels in one test compared to 100 bushels for the best open field pollinated. Compared with the kind of corn that many farmers plant it should increase yields 20 to 30 bushels per acre.

HOW IT IS DEVELOPED

First many different strains are inbred by self fertilization. This inbreeding is all done by hand labor and continues from 4 to 6 years. The best inbreds are then crossed. The next year the best crosses are crossed, giving a double cross inbred Hybrid. In crossing, one kind is detassled so it is fertilized from the other inbred in adjoining rows. The seed is gathered only from the detassled rows. This is good for seed only one year, but with increases such as this gives, it pays to get new seed each year.

There is a great difference in Hybrids. Any Hybrid is only as good as the inbreds that are used. Practically every breeder of Hybrid Corn uses different kinds of inbreds. Therefore these various Hybrids have distinct difference.

Our XX Hybrid has a deep yellow color. The stalks are very erect. That is an outstanding characteristic of our Hybrid. You find practically no barren stalks in the field. Many have two ears on them. Our customers report as high as 5 ears on a stalk.

Another important feature is the adaptability of our Hybrid to such a large range of country. It can be planted much further north or south and east or west, than ordinary corn. Matures in 105 to 110 days.

AN EXCELLENT INVESTMENT

At first thought the cost of Hybrid may seem high. Figure it down to the cost per acre and compare that with increases in yields that can be reasonably expected. It proves to be money wisely spent.

Our XX Hybrid seed corn comes to you treated in advance with Semesan Jr. The seed is not as nice in appearance as ordinary corn. The crop is different from the seed.

First Quality graded stock

¼ bu., \$1.00; ½ bu., \$1.70; ¾ bu., \$3.20; 1 bu., \$6.00; 5 bu., \$28.75.

Second Grade seed stock

¼ bu., \$2.20; ½ bu., \$4.00; 5 bu., \$18.75.

MONEY MAKING WHITE VARIETIES

St. Charles White

This is the famous white ensilage corn that produces such enormous crops. Clear white deep grains of large size, medium rough type. Red cob. Large ears. Stalk growth quite tall. Has broad succulent leaves. Used extensively for ensilage even in the northern states. Will yield 40 to 50 tons of green feed per acre. Makes a good milling corn on account of its clear color. It is a phenomenal producer in great demand. Place your orders early for St. Charles. Our seed stock is excellent high-testing and well graded.

BOONE COUNTY WHITE

A large white variety that has exceptional merit. Meets with immediate favor wherever it is introduced. The ears are a little larger around than the White Wonder, but not quite so long. The pearly white kernels are large and deep. Pure white cob. Strong germs and a vigorous grower. Matures in 115 to 125 days. We recommend this for southern Iowa and all points south or wherever a corn of this maturity can be grown. The big ears of Boone County White fill a wagon box quickly. It is an excellent variety and our seed is of fine quality.

SILVER KING

A very early white also known as Wisconsin No. 7. Resembles Silver Mine, but the ears, of course, are somewhat smaller and grains not quite so deep. Matures at least ten days earlier. Although earlier, it is a very good yielder and ranks foremost among the early white types. Will outyield yellow on poor soil. It's just the kind of corn many farmers are needing.

EXTRA EARLY VARIETIES

Minnesota King

A cross between a dent and a flint. Large, broad kernels, slightly dented. Deep, golden color. Eight rowed. Withstands very unfavorable conditions. This, in our opinion, is one of the most valuable of the extra early varieties.

LONGFELLOW FLINT

Fine 8-rowed yellow flint. Long, straight, slender ears. Large, wide kernels. Small cob. Very prolific.

SILVER TRIUMPH

An excellent white flint. One of the best. Long ears, often two on a stalk. Grows good sized stalk. Can be planted close and produces a lot of corn per acre. Fine for those who want real early yield. Can be planted quite late.

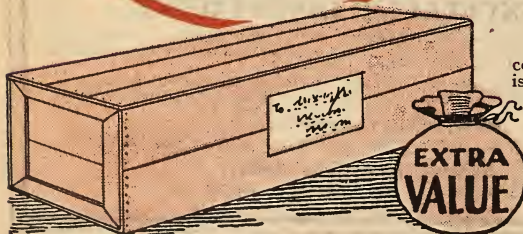

SANFORD'S WHITE FLINT

Very similar
to Silver Tri-
umph.

WHITE WONDER

Some ears are 12 inches long and over and proportionately large in circumference. They are big fellows. Makes good solid ears, well filled and not flinty. Good sized grains, fairly rough. Strong vigorous stalks many having one large ear and one small one. Out-yields any white corn we know of. Maturity 115 to 120 days. We have seen it outyield Reids Dent 31 bushels going to 92 bushels per acre.

Usually exceeds the expectations of the grower. It sure is a wonder for production.

VARIETIES**

\$ilver Mine

The most popular white variety in the corn belt. A splendid yielder. Does well on all soils. Best variety for thin land. Maturity about 110 days. Will stand thick planting. Many stalks produce two ears. Pure white grain and cob. Medium rough type. Good shelling percentage. Makes good solid corn. For all around merit it is hard to excel. One of the best varieties for general use in the corn belt. A safe, sure and profitable kind to grow. It makes friends everywhere it goes.

HOW WE SELECT OUR FAMOUS EAR CORN

Mr. A. R. Gorton, who has been chief of our corn division for many years, personally superintends the selection of our ear corn. Only the finest well formed, fully developed true to type ears are selected. He picks the cream of the crop. When you get a crate of ear corn you have something to be proud of. Each crate contains 70 lbs. of fine ear corn. Our shelled corn, of course, comes from the same fields and should produce equally well. Those who want to see it in the ear and know exactly the type they are planting will be delighted with this seed. We sell thousands of bushels of our seed corn in the ear.

The low prices we have on it this year makes the acre cost very low and certainly makes it a wise and profitable investment.

Extra Select Ear Corn in Limited Supply

The past year was not favorable for the fullest development of corn. Consequently the percentage of ears suitable for our ear corn is smaller and our supplies limited. We advise you to place your orders for ear corn early. Shipment is guaranteed to reach you in good condition. It is sold subject to any test you want to put it to. You can return it and get your money, plus freight, refunded if you are not completely satisfied and fully pleased.

We can supply our extra select ear corn only in the following varieties. Big Perfection, Pride of Iowa, Krugs Dent, Reids Dent, Improved Leaming, Legal Tender, Iowa Gold Mine, Silver Mine, Boone County White and White Wonder. All other varieties are available only in shelled corn.

CANE

A Leading Forage Crop

A crop that is rich in sugar and fat and very palatable. An enormous yielder producing from 10 to 15 tons of excellent green feed on rich land. A most remarkable drought resister. Especially valuable in dry hot seasons. Makes a wonderful hay crop when sown at the rate of 75 to 100 lbs. per acre.

Some farmers get cash out of their ordinary hay crops and use cane for their own feed supply. A few acres of cane will make as much hay as many acres of Timothy. Your live stock will relish cane hay and fatten on it. You can also pasture cane or cut it for green feed. Makes excellent summer and early fall feed. It is also used for ensilage. Cane is also a good seed producer, yielding 30 to as high as 60 bushels per acre.

How to Handle

Sow quite heavily for hay or pasture, 75 to 100 lbs. per acre. Heavy seeding makes a finer growth and therefore easier to cure. Do not sow until corn planting time or after. It is a warm weather crop. Drill in close rows, or broadcast. Cover about an inch. Can be cut and cured like ordinary hay. Takes a little longer to cure than ordinary grass hay.

Early Amber. The kind most generally grown and of great value because of its splendid growing qualities.

Early Orange. Heavier stalks more abundant leaves. Seed head more compact. Heavier yielder but a little coarser.

CANE for MOLASSES

To make good sorghum, seed must be pure and we take care in getting this seed direct from sorghum producers. We do not guarantee the crop, but we consider our seed equal to if not superior to any on the market.

Ames Special Sorghum. An improved type of the Amber. Makes excellent sorghum of fine flavor and color. Very juicy. We recommend it highly. We are sure you will be pleased with it.

Silver Tip. More after the orange type. Makes delicious mild, clear, light colored molasses. Ranks very high in favor with expert sorghum makers. Produces lots of syrup of a superior variety.

Price, 1 lb., 30c; 5 lbs., \$1.00, postpaid. Not prepaid, 5 lbs., 75c; 10 lbs. or more, 10c per lb.; 50 lbs. or more, 9c per lb.

FLAX

Special Wilt Resistant

Flax is coming back strong since the wilt resistant types have again made it profitable. Permits greater diversification of crops. A better money maker. Berry's Special is a type you will like. Good seed producer. Sow $\frac{1}{2}$ to $\frac{3}{4}$ bushels per acre. Seeded in most sections during April.

BERRY'S Special GRAIN and HAY CROPS

KAFFIR CORN

A sorghum grain crop. Used to some extent for hay. Stalks less juicy than cane and not sweet. Stands lots of hot dry weather. Makes fine poultry feed and suitable for all kinds of live stock when ground. Produces up to 40 to 50 bushels of seed per acre. For grain drill in rows 30 to 40 inches apart using 6 to 8 lbs. of seed per acre. For hay drill close or broadcast 75 to 100 lbs. Cut off heads, cure, 10 days to 2 weeks then thresh. Our seed is high germinating. Prices are very low on both Red and White Kaffir.

SEE
PAGE
25
for
SALE
PRICES

Feterita

The greatest drought resister of all. Earlier than Kaffir. Has a higher protein content. A very heavy producer. Grains flat in shape, bluish white in color. The crop is a free stooler. Handle like Kaffir. Adapted to a large territory because of its earliness. Makes good hay if seeded 75 to 100 lbs. per acre. For grain about 6 lbs. You'll like this leader among grain sorghums.

PROSO

A variety of Millet grown almost exclusively for seed. Very prolific producer. Seed larger than other Millets. Used in some countries for human food. Equal to Barley in feeding pork. Extra fine poultry feed and used in nearly all bird seed mixtures. Crop is also known as Russian Wheat or Broom Corn Millet. Matures very early, 60 to 70 days. Yields up to 60 to 70 bushels per acre.

Excellent cash crop. Sow after weather is warm. Sow 40 to 50 pounds per acre. Drill in close rows. Demand for seed greatly increased in past two years.

BUCKWHEAT

A quick growing grain crop. Matures in 10 to 12 weeks. Excellent catch crop. Sometimes get two crops from the land. Good cover crop for orchards. Makes land mellow. Good for bee pasture. Does well on all soils excepting wet land. We have two varieties. Both are excellent yielders. Our seed is thoroughly cleaned and guaranteed to be satisfactory in every way.

Japanese. Rich dark brown. Strong grower. Earlier than most varieties. In big demand.

Silver Hull. Thin shelled. Silver grey. Medium sized grain. Makes nice flour.

MILO MAIZE

Similar to Kaffir. Earlier. Stalks more pithy. Requires less moisture. Fine feed. Handle like Kaffir. Color white. Excellent yielder. Our seed high testing stock. Prices low.

Broom Corn

Grown for straw in the seed heads. 4 to 5 pounds plants an acre.

Improved Standard — Excellent straw of good strength and stiffness.

Dwarf Evergreen — Best for dry conditions. Price, 1 lb. 20c; 5 lbs. 75c postpaid.

LOW PRICES on SELECTED, TESTED

SEED OATS

Better Seed Pays

When you ask some farmers about better seed oats they will tell you that oats is their poorest paying crop and that they can't afford to spend money for better seed. Did it ever occur to you that is why oats are a poor paying crop on many farms? They have just let the seed run down to where every acre seeded to them is a money losing acre.

On the other hand there are hundreds who have learned that seed does make a big difference in yield and that Berrys Seed Oats excel in production. We handle northern grown stock. Several of our varieties are grown in Montana. All of our seed is thoroughly cleaned and graded. We give you those big plump meaty kernels from heavy yielding strains of best producing varieties. We pay a premium for this seed stock and lose a considerable portion in grading. Such seed is certainly worth its cost.

Change Seed Often

It will pay you to get such new seed stock every 3 or 4 years so you can get the necessary production to make the crop pay out. When markets are low you must have a big yield in order to avoid loss. We have the kinds that are profitable to grow.

RUSSIAN GREEN

An extra good producer. Early maturing being only 4 days later than the extremely early Iowa 103. Color, yellow cast with green tip. Not quite as nice in appearance as a pure white variety but generally excels in production. Thin hull, lots of meat. High feeding value. Very resistant against rust. Once established in a neighborhood it meets with immediate favor. The first crop is often sold entirely for seed. We recommend it highly as it does well even under unfavorable conditions. Supply limited. Order early.

Swedish Select

Our regenerated stock is Montana grown. A great improvement over ordinary strain. It is a revelation in production. Yields reported up to 100 and as high as 140 bushels per acre. Large white plump meaty kernels. Straw fairly tall. Stands up well. Color white. Medium maturity. Large sprangled heads, heavily laden with rich grain. It is a magnificent variety and an excellent money maker. You certainly will be pleased with it. Very popular with our trade. Always in good demand. Seed Guaranteed to satisfy.

Hall, W. Va.
Dear Sirs: I have been buying seeds from you for a number of years for my own use and for the Boulder Farm Club. The seeds have always given entire satisfaction, and we have saved over one hundred dollars by ordering from you.
Very truly yours,
Ira L. Dadisman

BIGGER YIELDS

LOW PRICES on
PAGE 25

GREAT NORTHERN

Big heavy meaty oats. Has the largest grains and is the heaviest producer of all our varieties. Kernels nearly twice as large as the average grown in this section. Straw is stiff and quite tall. Color white. Quite early for so large a variety. Weighs out very heavy. Prolific stouter. Strong plants. Has produced 137 bushels per acre. Its a money maker. You should be able to show your neighbors something about growing oats with such a variety. Our seed is Montana grown, carefully cleaned and thoroughly graded.

NEW ALBERTA

Another of the large heavy white types. Tall stiff straw. Kernels a little plumper than Great Northern but not quite so long. A great favorite in the north and widely grown by our customers throughout the corn belt. Medium as to maturity. An extra fine quality. Lots of meat. Comparatively thin hull. Seldom lodges. A rapid vigorous grower and a very heavy yielder. The first crop of these wonderful oats in a neighborhood can generally be sold at a good premium for seed stock.

FULGHUM

Heaviest producer of the early varieties. Outyielded other varieties 12% to 17% in a seven year test. Very resistant against smut. Where Khersons showed 25% to 40% smut in a smut inoculated field the Fulghums were practically free. Straw medium short spreading at lower joints. Medium sized kernels golden yellow color. One of the best kinds for rich land and outyields others on thin soil. Should be sown early. Extra fine, heavily re-cleaned seed stock. An exceptional variety that is sure to satisfy.

SMALL GRAIN TREATMENT

Ceresan Treatment for Small Grains

A dry treatment. Very effective. Controls bunt or stinking smut of wheat, stripe disease of barley, loose and covered smuts of oats and barley, and covered kernel smut of soy beans as well as seed borne smuts of rye. Does not injure grain drill. No water needed. Use only as a dust. Takes 2 ounces per bushel for wheat, rye and soy beans, 3 ounces for oats and barley. Easy to apply. Economical to use.

Price, 1 lb., 85c;
5 lbs., \$3.00;
25 lbs., \$12.50;
Must be shipped
by express. Poison,
not mailable.

GOLDEN RUST PROOF

One of the best kinds of grow under unfavorable conditions. Very resistant against rust. A heavy meat. Golden color. Fine berries. Steamed or fried.

PRIZE QUALITY

A wonderful early white oat. Originated from a sixty day variety. Outyields both Iowa 103 and 105. Grows a somewhat longer straw. Thin hull. Grain has a small black awn. Medium size. Rapidly replacing other early white types. If you want a better yielder having higher feeding value and a little longer straw choose Iowar. Our seed stock is extra nice. See page 25 for prices.

SUPERIOR IOWA 105

CREAM of the CROP

This is an improved strain of a famous early white variety. Sometimes called the "Fourth of July" oat. A good yielder and a fine nurse crop. Stands up well. Adapted to the richest soil and one of the best producers on thin land. While they will not yield as heavily as our later varieties they are a good variety to select when extreme earliness is desired. It is an extra profit maker.

EARLY CHAMPION

New HULLESS

BIG YIELDER—NO WASTE—FINE FEED

Ordinary oats are 28 to 40% hulls. This variety has no hulls. It's all meat. Grain similar to rye but softer and lighter in color. They are also excellent producers in several cases, having outyielded the ordinary hulled oat. Even should it fall a little below in yield the increased feeding value of the Hullless makes it very profitable to grow.

Straw is of medium length and strong. Equally as hardy and drought resisting as ordinary oats. These oats can be fed without grinding. They certainly are fine feed. One grower reported his Hulless oat smut free while common oats were badly affected. In order to assure full protection against smut we treat all our Hulless oats with copper carbonate to destroy any smut spores. This treatment is effective only on Hulless.

Our seed is fine quality, carefully cleaned, and graded. It is a real seed stock. We have new low prices on these oats this year.

SILVER MINE

Our strain of this variety surely deserves the wide popularity it enjoys. It is a superior quality grain, combined with heavy yielding ability. A white oat with a soft hull. Meaty kernels. Medium early. Medium length strong straw. Our northern seed weighs out heavy. Grow some of these extra fine feeding oats. Profit by these extra fine feeding oats. Profit by their heavy production. They are adapted to a wide area.

**WHITE
HULLESS**

Has no Beards and no Hulls

A remarkable grain. Kernels resemble wheat in size and shape but lighter in color. Weighs out around 60 lbs. to bushel. It is sold however on basis of other varieties, 48 lbs. Straw is more leafy than other varieties. It is frequently cut for hay. Stands up well. It is particularly drought resistant. Heavy producer, yielding up to 40 to 70 bushels per acre. It is entirely free from beards.

We consider it fully equal to corn in feeding value. Exceptionally good for hogs and poultry. A fine plan is to feed both barley and corn. That gives a combination of nutrients superior to either crop fed alone.

The crop is easy to grow. Sow around 2 to 2½ bushels per acre. Handle like any small grain crop. The first crop in a neighborhood can often be sold at a premium for seed. Get acquainted with this remarkable profitable grain crop.

ODERBRUCKER

Also known as Wisconsin 55. This, in our opinion, is the heaviest producer of its type by 5 to 10 bushels per acre. Plumper kernels. Great disease resistance. Higher protein test. Better feed. A bearded variety that gives greater returns. Our strain of Oderbrucker will please you. You can't afford to go on with low yields on small grain. Better seed will help you out. This fine variety of this profitable grain produces more wealth. Discard poor seed. Invest wisely in better stock. Our seed is fine quality, bright and better state of production by proper seed selection. You will find it to your interest to use seed of this character.

Danese, W. Va.

Dear Friends:
I have found you an honest and reliable house. Your seeds are certainly good and reliable in every respect. I am well satisfied with your service.

Yours truly,
WATSON COLE.

BARLEY

Value of the Crop

Barley is the heaviest producer of all small grain crops. It makes most desirable feed as it is rich in those bone and muscle building elements that develop strong, healthy animals in quick time. It is very early, being ready for harvest the latter part of June or early in July. It is the best nurse crop of all grains for grass and clover seedings. Stands up on rich ground, and does well under adverse conditions.

Many farmers have long known of the money making features of barley. Now that improved varieties of the beardless and smooth bearded types have been developed, the increase in barley culture has increased greatly. Not only are these varieties pleasant to handle, but they are more productive. If you want to make more money on Spring grains sow our Improved barley varieties. They bring results.

**LOWEST
PRICES
ON
HEAVIEST
PRODUCING
VARIETIES**

VELVET

The KIND With SILKY BEARDS

Our Velvet Barley is a revelation. It looks like ordinary barley but is distinctly different. The beards are there but those bothersome sticky barbs are gone. The beards are as smooth as silk. It's just as pleasant to handle as a beardless variety and under unfavorable conditions you get the protection of the beards.

In yield it ranks at the top. Most farmers reporting on it say it is the heaviest yielder they have ever grown. The straw is even stiffer than the average. It is very resistant against spot blotch disease. Barley ranks next to corn in the number of pounds of grain produced per acre. With such an outstanding yielder as our Velvet the increase in production over other grain is still more profitable.

Our Velvet is adapted to a wide area. With the introduction of this variety many farmers are changing from oats to barley. It is proving a better nurse crop, a heavier yielder and an earlier maturing crop.

You will receive a very high grade shipment of seed when you order our Velvet and you will be starting a more profitable variety of grain.

A VERY POPULAR VARIETY

CHAMPION BEARDLESS

A Profitable Kind to Grow

The heaviest producing smooth headed variety. The most popular kind of all. Heavy yields and no beards, account for the big demand for this seed. Also it is very early, maturing the last of June or early in July. Does well even under adverse conditions. Production ranges up to 40 to 70 bushels per acre. Stiff straw. Heavy heads. Excellent feed, very fattening. Extra good nurse crop. It is the nicest small grain crop you can grow. It is grown under a wide range of climatic and soil conditions. Makes friends everywhere.

Big Demand for Champion Beardless

Our Velvet and Champion Beardless run a close race in popularity with the Champion generally the favorite. If you could see a field of this barley about the time it is maturing you would sure see a wonderful sight. It's not looks however, that count. It's the profit-making yields that make Champion Beardless a sound investment.

Our Champion Beardless always sells out before any other. We advise early orders for this variety. Consider that it is extra early; one of the best yielders, pleasant to handle and extra fine feed. You will like our improved, recleaned, high quality seed.

See Page 25 for New LOW PRICES

SPELTZ

ALSO CALLED EMMER
NORTHERN GROWN

Great Drouth Resister. Practically Rust and Smut Proof. A Heavy Producer. Extra Rich Feed

This remarkable grain crop is really a type of wheat. The kernels are smaller and the shuck clings to the grain instead of becoming separated in threshing. The grain is somewhat softer and there are generally two grains in a shuck. Both shuck and kernel make excellent feed.

The stems of a speltz plant are pithy instead of hollow. It is unusually strong. Heads are compact and heavily set with grain. Leaves are velvety. It is a wonderful drought resister and in dry sections will outyield oats and barley. Matures very early and is grown from Canada to Texas and east and west across the continent. Its freedom from rust and smut makes it especially valuable when these diseases cause heavy loss. Speltz is a bearded grain.

You will find speltz a fine nurse crop. Its heavy yields, earliness and high feed value combine to make it a very satisfactory grain crop. Our customers are introducing the grain into all parts of the nation. The first grower in a neighborhood generally has the advantage of selling his first crop for seed.

**SPRING
WHEAT**

NORTHERN GROWN

The Famous New Marquis

An early, beardless heavy yielding variety. Earliness is very important in getting a good crop of spring wheat. New Marquis is a week to ten days earlier than the average. Using northern grown seed also gives earlier maturity and a much better quality of grain. Our New Marquis is all the finest northern grown re-cleaned and graded seed.

Our New Marquis has a plump fat kernel, dark red in color and harder than most. It is one of the finest, milling wheats grown. Has more gluten, better color and higher absorption. In yield we consider it easily 5 to 10 bushels per acre better than others. Being beardless it is pleasant to handle. Heads are not so long but heavy. Straw fairly short. Stands up well.

Buy wheat like this, and get some profit from the crop. Order seed now. Sow it early. You'll find that it certainly does pay to use real high quality seed such as we will ship to you.

Northern Grown SPRING RYE

This is a distinct variety. Strictly a spring grain crop. It is grown for grain, pasture, and hay. No doubt this triple usage is why the crop is so popular. The grain is practically the same as winter rye. It is a good yielder of grain. Good length straw. Sometimes used with Canada Field Peas for hay. Wonderful producer on good land and the best small grain for thin soil. Early seeding gives best result but may be sown later than most grains if necessary. Sow around 2 bushels per acre.

Rye makes a very fine feed as pasture and grain. Helps out on the early spring feed problem. We try to figure out the seed demand so we will have enough for our trade without any to carry over. Nearly every year we underestimate the demand so we ask you to order your spring rye early. It is a crop that we are sure will please you. It is a money maker and our prices on this northern grown high quality seed are very reasonable. See page 25.

Winter Wheat

We have some extraordinary varieties of winter wheat for fall seeding. Some of them are guaranteed to outyield your own stock. Along in July we publish a smaller bargain catalog describing and pricing winter wheat and also Alfalfa and other seeds for fall sowings. If you fail to get a copy of it be sure to write us for it. It will save you money.

THE MORE YOU BUY - THE MORE YOU SAVE

Start Growing Speltz

Show your friends what this crop can do. Sow $2\frac{1}{2}$ bushels per acre. Set your drill about as for oats. Sow as early as possible. It stands considerable frost damage. Thresh as for oats but not too close. Cut before it is dead ripe. Cut earlier if you want it for hay. There is nothing difficult about growing speltz.

Consider these facts. Speltz is a hardy crop; a heavy producer; a rich nutritious feed, does not lodge, makes a fine nurse crop; is drought and disease resistant and is a most desirable crop. Our seed is fine and prices are at new low levels.

We have some very fine speltz seed this year at low prices. Now is a fine time to get started with this grain. Send orders as early as possible.

Palmyra, Mo.
Dear Sirs:

The two cars of Seed Wheat we bought of you last year to which you gave the Copper-Carbonate treatment, proved very satisfactory and we had a wonderful yield from same. We were specially pleased with your usual prompt service. Having used your seeds for past 15 years makes me feel very kindly to the Berry Seed Co.

Yours very truly,
W. A. Rinehart.

CROPS of SPECIAL VALUE MILLETS

BLUE RIBBON MONEY MAKERS

Our forage crop varieties are all selected with our customers' interests in view. You want the kind that will make you the most money. In order to get that you must have heavy producing strains. The seed must be carefully cleaned and graded. It must test high in germination. You get these features on every shipment we make. Nothing is left to chance. Accurate tests are made. It is to your advantage to buy such seed.

DWARF

ESSEX RAPE

Marvelous Hog and Pasture Mixture

This crop will help you materially in cutting the cost of producing pork or mutton. These animals, especially when young, need plenty of protein. That is the most expensive of all food elements. Rape is exceedingly rich in protein, analyzing 37% digestible protein.

Its yields are sensational. On rich moist land it will produce as high as 24,000 lbs. of green feed per acre. Rape is used as a pasture, although if mixed with Millet can be cured for hay. The cost of seeding is very low. The seed is cheap (see page 25). It only takes 6 to 8 lbs. per acre. It can be pastured in 6 to 8

weeks after seeding. Sow any time from oat seeding until early July.

Experiment stations recommend Rape highly. It builds big, strong body frames. Cuts down on grain consumption. Gets stock ready for market earlier. Used chiefly for hogs and sheep, but is good for all kinds of young stock. Our seed is genuine Dwarf Essex, which is the only kind to sow. 5 lbs. postpaid, \$1.00. See price list.

Friends; if you really knew the money-making features of this crop you would never be without it. We urge you to try at least a small patch of it. Pick out a fairly rich plot and sow some this year or sow in corn at last cultivation. You'll be amazed at the results the crop will give you.

Scotia,
Nebr.

Dear
Sirs:

My
father
started
buying
seeds from
you in 1898 and

I have used Berry's seeds for the past 15 years. Have never had a complaint. You have always satisfied me and saved me money.

Yours truly,
CHAS. KEOWN.

VETCHES

Spring Vetch

An annual variety having much the same characteristics as peas. Does well wherever Canada Field Peas are grown. Requires cool growing season. Should be sown early, using 50 lbs. per acre. Grows 3 to 5 feet high. Is quite finely stemmed. Generally sown with a bushel or two of oats and the two cut together for hay. Grows rapidly, yields heavily. Excellent feeding value; high in protein. Produces a wonderful early hay crop. Makes best hay if cut when in full bloom. Does not live over winter.

SAND OR HAIRY VETCH

Also called Winter Vetch. May be sown spring or fall. Lives over one winter. Use 20 to 25 lbs. per acre. Can be sown with spring grain and pastured some in fall. Remains green for a long time. Excellent cover crop. Fine soil builder. Good yielder. High feeding value. Inoculate all Vetch seed. See pages 24-25.

BARGAIN PRICES SEED POTATOES

Northern Grown Seed Stock

Every large and experienced potato grower knows that he gets his heaviest yields and finest quality by using northern grown seed. Most of them get new seed every year. Many experiments have proven this to be profitable. Minnesota seed has done the best of all.

We handle only Minnesota Seed stock. It is all graded and inspected seed. All shipments are guaranteed to arrive safely and to show up to your satisfaction. Mail your orders early. Shipment will be made as soon as weather conditions make it safe.

EARLY RED RIVER OHIO

Our seed of this variety is fine. They mature extra early. They are good keepers and money makers. Our stock comes direct from the Red River Valley. It is real seed. Planting such seed gives increases of 25% to 100% over most home grown potatoes. The quality is distinctly superior. There is a better demand for such potatoes, and much better profit in growing them.

Our Early Red River Ohios have a light pink skin. Flesh is pure white. Produces good sized uniform tubers. Eyes are near the surface. Very little waste in peeling. Vines grow upright. Potatoes grow in a clump. Easy to dig. Our northern grown seed matures about two weeks earlier than southern stock, giving you the advantage of earlier markets and better prices.

BERRY'S GENUINE IRISH COBBLER

Our Cobblers are one of the finest potatoes you can grow. They are in a class by themselves. Enormous yielders. Well formed. Finely flavored. Skin and flesh white. Cooks dry and mealy. Greatly superior to the mushy kind. A splendid keeper. Tubers are large, rather round with some oblong. Smooth skin with deep set eyes. Vigorous, thrifty growers. Medium early.

You may have grown Cobblers before but we feel sure you have never raised any equal to these. They are wonderfully popular. You don't have to pay long prices for some fancy variety to get an extra quality potato. Grow some of Berry's Genuine Cobblers and you'll have something to brag about.

LATE VARIETIES

Banner

A superior variety of the later type. Roots deeply in dry season. Thrifty grower and a remarkable drought resister. Produces smooth plump handsome tubers. Beautiful creamy white. Eyes strong and on the surface. Skin slightly netted. Cooks quickly, dry and mealy. Shape a little oblong and slightly flattened. As nearly blight and rustproof as can be. A splendid keeper and enormous yielder. Medium late in maturity. Very popular. We know you'll like them.

BERRY'S IMPROVED BONANZA

Greatly improved in hardness and yield. A very high quality potato. Reddish skin, very white flesh. Firm grained, very dry and mealy. We consider this the most desirable main crop variety. Best yielder, keeper and shipper. Vigorous dark green vines. Withstands lots of heat and drought. We sell many carloads of this variety and recommend it highly. Excellent for market or home use. Medium early maturity. It sure is a dandy variety. Be sure to include it in your order.

CARMEN No. 3

A very heavy producer. Practically every potato of marketable size. Both skin and flesh are white. Eyes few and shallow. Excellent table qualities. No hollow hearts, and no dark or hard spots. If you wish a white skinned potato of the late type you will find this a very profitable variety. It sure is a money maker.

RURAL NEW YORKER No. 2

Another wonderful late kind. One of the best keepers. Smooth, shallow eyed and prettily shaped. Exceptional drought resister. A great yielder. Chosen by many as the best of main crop varieties. A sure producer of excellent quality potatoes. If you want some potatoes that will keep in fine shape until the new crop is ready plant some of our Rural New Yorkers. They will satisfy you.

SPAULDING ROSE

Between early and late in maturity. Color slightly red. Shape long and very large. Flesh white and mealy. Wonderful yielder. A great potato for locality of a short season. Strong vines. If you want a variety that is not too late and yet not an early potato this will make a fine selection.

SIR WALTER RALEIGH

Pure white in color. Round to oblong in shape. Finely grained. This is a newer variety than some, but well established as one of the leading main crop potatoes. It is steadily becoming more popular because its many high points of fine quality and big yields are proving it an exceptional money maker. Our seed wins friends everywhere it goes. It is in great demand and we urge you to try it.

Price in small lots, any variety.
Postpaid, 1 lb., 20c; 5 lbs., 65c.

POTATO TREATMENT SEMESAN BELL or Dip Dust

The modern method of checking disease on potatoes. No soaking necessary. Just mix, dip, drain and dry and your potatoes are ready to plant. Controls such costly diseases as scab, rhizoctonia and black leg. Increases yield 15 to 25%. One pound treats 16 to 20 bushels.

Price, 1 lb., \$1.75; 5 lbs., \$8.00, express pre-paid.

Twinbrook
Farm,
Emaus,
Penna.

Dear Sirs:
I have
been using
your seeds
for thirteen
years which

in itself means quite a lot. I have found your seeds satisfactory and always saved money by buying from your Company. My Sudan was wonderful and your Dakota No. 12 Alfalfa was the only field in the neighborhood that did not show bare spots after the first winter.

Yours,
P. G. Lichtenwalner.

KENTUCKY BLUE GRASS

New Seed at Low Prices

You can buy our finest Kentucky Blue Grass at exceedingly low prices this year. See page 24. You cannot afford to have pastures with thin stands, when seed can be had at these figures. Make new seedings heavy. Thicken up old stands with a top seeding. Make your acres give you more pasturage.

Our seed is all new crop, thoroughly re-cleaned, heavy weight seed. It is high germinating seed far superior to light chaffy seed, frequently sold. Quite a lot of Kentucky Blue Grass seed carried over last year which will be of lowered germination.

Our seed is all new crop. It's the kind that produces those beautiful productive pastures that are the pride of every farmer.

Small lots, Postpaid, 1 lb., 35c; 5 lbs., \$1.50; 10 lbs., \$2.75. Also page 24 for prices.

RED TOP

The Grass That Grows Most Anywhere

No land is too poor to grow Red Top. It does well where many other grasses fail. If you have trouble getting a stand of grass sow Red Top—it seldom fails. It grows on dry land, and is especially adapted to wet land. Some like it mixed with Alsike Clover. It matures along with Timothy.

Red Top grows on soils low in lime. It is a great drought resister. Stops washing of the soil. Makes a good hay crop. One seeding lasts several years. Begins early in Spring, and continues its sturdy growth throughout Summer and Fall. Sow about 10 lbs. to 12 lbs. per acre.

This year our price on Red Top is very low. Our seed is very high quality. You get a real bargain in the kind of seed that will give you the best assurance of success. We guarantee to save you money.

ENGLISH BLUE GRASS OR MEADOW FESCUE

Now you can secure high grade new crop seed at ridiculously low prices.

This valuable grass obtainable at bargain prices. Very hardy. Grows in all sections. Height, 2 to 3 feet.

Highly nutritious. Good for hay and pasture, but used principally for pasture. Produces

two tons of hay per acre on average good land. Stands last longer than Timothy.

Begins growth very early in Spring. Keeps growing

after frost kills native grasses in Fall. One of the very best for wet

land. Seed quite a bit larger than Kentucky Blue, and

much cheaper this year. Sow 20 to 25

lbs. per acre for full seeding. Sow

spring or fall on well prepared

seed bed. We have some

beautiful seed for you

at very reasonable

price.

English Rye Grass

Similar to Domestic Rye Grass, but a perennial.

Rapid grower. Very nutritious. Used for meadows, pastures and

lawns. Bears close cropping. Makes

a beautiful sod. Same price domestic.

Glenbeulah, Wisc.

Gentlemen:

I have been your customer for many years, and have always had satisfactory results. Your

grass seed is so dependable, being so free of noxious weeds. One field of Alfalfa from your seed lasted nine yrs. Yours truly, OTTO H. HERRLING

BROMUS INERMUS

Also Known as Brome Grass

Excellent Drought Resister and Heavy Yields

Makes a splendid hay and pasture crop. Good feeding value. Livestock is very fond of Bromus. Produces heavily. Roots of Bromus go down 5 to 6 feet. It is a wonderful drought resister. Stays green when other grass becomes dormant. Starts a couple of weeks ahead of most grasses. Does well on clay loam and sandy soils. Usually makes some hay first year. Second and third years produce extra heavily. The most severe winters will not kill it. One seeding lasts many years, yet it is not difficult to eradicate.

Our prices this year on Bromus are at bargain levels. Now is a good time to start with this heavy yielding, cold and drought resisting grass. Sow 20 lbs. per acre, spring or fall. May be sown with or without nurse crop. Seed is larger than the average grass and should have a light covering. Our seed is high quality free from quack.

The great increase we have had in the demand for Bromus during the past few years shows its growing popularity. It is a distinctive grass that increases production and profits.

Small lots. Postpaid, 1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$2.25.

See page 24 for wholesale prices.

ORCHARD GRASS

Low Prices on New Crop Seed

A very productive perennial grass.

Starts growing very early in the spring. Grown in every state in the

Union. Makes good hay. Yields about same as Timothy. Best grass

for shady places. Keeps creek banks from washing. It is a

good drought resister. Makes a fine combination with Red

Clover for hay. Gives heavy

aftergrowth after hay crop.

We know that customers

who start with Orchard

Grass will seldom do

without it. It is a grass

of great value. It will

pay you to get acquainted with it.

Our seed is all new crop and guaranteed to

satisfy. Sow 20 lbs. per acre.

See page 24. Small lots, Post-

paid, 1 lb., 30c; 5 lbs., \$1.25; 10

lbs., \$2.25. See page 23

for lawn grass mix-

tures. Postpaid Prices, 1

lb., 50c; 5 lbs., \$2.00; 10 lbs., \$4.00.

Canada Blue Grass

This is also known as Virginia Blue Grass. Thrives

on soils composed chiefly of clay, particularly stiff clay soils

of low fertility. Also good on gravelly clay

soils but not so good on sandy soils. Average growth

8 to 12 inches. Forms a close turf. Excellent pasture for

beef and dairy cattle. Withstands more heat and drought

than Kentucky Blue. We have seed of beautiful quality.

Our prices this year have been greatly reduced and are bargain

quotations. Sow about 20 lbs. per acre.

BERMUDA GRASS

A southern grass not suited for northern

states. Very extensively used for lawns and pastures. It spreads to

make a dense turf. Especially good on clay but also does well

on sandy soils. Helps to keep soil from washing.

Seed very small. Sow 8 to 10 lbs. per acre. Postpaid Prices, 1

lb., 50c; 5 lbs., \$2.00; 10 lbs., \$4.00.

Apple Grove, W. Va.

Dear Sirs:

I have been using your seeds for the past five years. I find them perfect in every way. Good in purity, high

in germination. They surely stand extreme cold weather. Your prices are much cheaper than I can find anywhere else.

Yours respectfully, C. D. PUTNEY.

RED CLOVER

**The Nation's
Greatest Clover Bargain
Guaranteed Best Value**

We guarantee this to be the best value for the money that you will be able to find anywhere, anytime this season. You may find lower prices but nowhere as much real high grade seed value at such a price. Order this seed now. After you get it we will allow you 60 days to make any comparison or test you wish. If you can match our value, or if for any reason whatsoever you are not thoroughly pleased with your purchase, you can return the seed and your money plus freight will be promptly refunded.

See Sample Enclosed

It speaks for itself. Bright color, bold berries, high purity and strong germination. It has everything you want. No seed could do more for you. It is far superior to the average seed. It is better than what is quite generally sold as the best. You will find it more economical. It goes further. You take no chance on noxious weeds.

Lot Leader is hardy northern grown seed. It is adapted to the most severe climates. There is no southern or Pacific Coast seed in it. It is a safe sure seeding anywhere.

Markets Have Advanced

Red Clover seed production is far below that of last year. Early in the fall seed sold at low levels on account of depressed conditions. Since then the shortage of seed has become evident. Markets advanced rapidly. Further advances are bound to come. A large acreage of clover will be seeded. Old stands are way below normal. Higher prices must follow. Save on our early purchases.

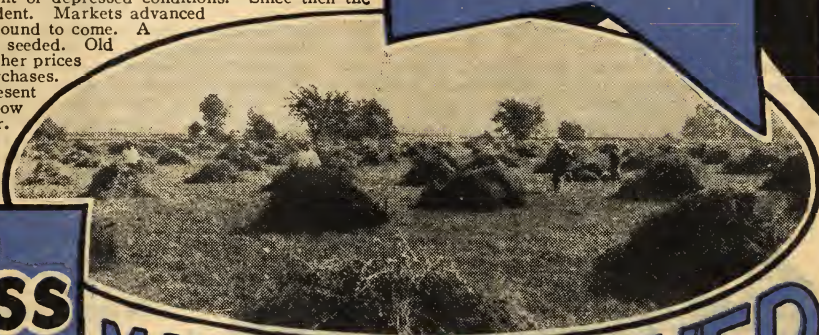

Take advantage of our present values. They are unbeatable now and cannot be duplicated later. Lot Leader gives you the utmost in quality value. Our early buying saves you money.

A SENSATIONAL VALUE

MAMMOTH RED CLOVER

Guaranteed to Save You Money

This is beautiful seed. Fine color. Excellent purity and germination. Free of noxious weed seeds. It will satisfy the most critical buyer yet priced so low that it will delight the most exacting bargain hunter. This is guaranteed a "Matchless" value. It is genuine hardy northern home grown Mammoth. The seed is full of the strength and vitality that makes heavy healthy stands. It is even nicer than Lot Leader of which a sample is enclosed.

This is a bargain that spells real economy. Such seed goes much farther than the average. You are more sure of getting a stand from it. A "stand" is what you want. That's why you buy seed. You want it clean and hardy. That's what you get in Lot Matchless. We guarantee that you can't beat this value.

Mammoth Clover is a large variety of Red Clover. It is also known as Sapling, Big English, Bull and Pea Vine Clover. Superior for soil building. Extensively grown where seasons are too short for two cuttings and wherever an extra heavy crop is desired. Does not make a second hay crop like common red but does make good second growth for pasture or plowing under. Genuine Mammoth always sells at a premium. Our price is extremely low considering the highly desirable quality of our seed. Advancing markets are making this a bigger bargain every day. Order it while we have it at this price.

Auburn, Mich.

Gentlemen: I find you always live up to your advertisement, "Quality seeds at lowest prices." Your clover is putting my soil back to profitable land and at your low prices we can plant more of it.

Yours truly,

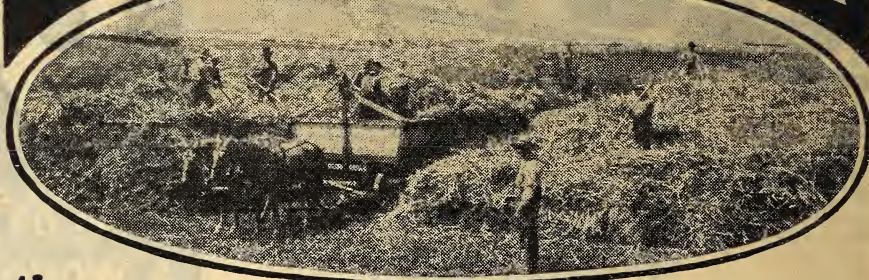

August Krieger.

**LIFE
SAVER**
FOR THE
FORAGE
SITUATION

**WORLD'S
GREATEST
FERTILIZER
CROP**

SWEET CLOVER

Varieties

The **Common** or **Big White** is the kind most generally grown. Lives two years. Grows 6 to 8 ft. high if not cut. For pasture and soil building this variety ranks highest. Has big powerful roots that go down deep. They decay quickly when crop is plowed under.

Grundy County White lives two years. Does not grow so large, generally not exceeding 3½ ft. It is about 3 weeks earlier than Common. Seed is smaller.

Yellow Biennial lives two years. Larger than Grundy but not as large as Common. Matures in between the two. Finer stemmed and more leafy.

Hubam. An annual or one year variety. Makes complete growth in one year. In big demand when it is desired to plow under the crop in the fall of the same year it is sown. Resembles common white when growing.

BLUE RIBBON BARGAINS

**UNHULLED
SWEET CLOVER**

ALL RECLEANED SEED

\$1.50 at **CLARINDA**
PER BU. 30 LBS. to BU.
\$1.65 at **CHICAGO**
PER BU.
BAGS FREE

White or Yellow

Thoroughly recleaned unhulled seed is the best to use for early winter seeding. It is better than hulled seed either scarified or unscarified. Germination is slower. Will not start to grow during a warm spell in winter. Becomes firmly embedded in the soil. Waits until spring, then grows rapidly. Many customers report that the sowing of our unhulled seed early in the winter gave them the finest stands they ever had. Sow about 20 lbs. per acre. Just broadcast it. No seed bed preparation necessary. If convenient cover it a little before growing season starts. Otherwise let nature take care of it.

Our seed is all fancy new crop very carefully cleaned seed. It is a high grade product and our prices the lowest ever made since the crop was put to general farm use.

Buy Now—Save Money—Sow Early

You Need Sweet Clover

You are looking for better farm profits. Are you doing all you can to get them? You can't do much about prices but you can do a lot about production. Sweet Clover is the greatest soil building force that nature has placed at your command. Use it liberally this year. The seed is the lowest priced in the history of the crop. If there ever was a time when you needed Sweet Clover that time is now.

The Greatest Soil Builder

It is easy to increase your corn crop 20 to 25 bushels per acre after Sweet Clover. That has been done thousands of times. You need those extra 25 bushels for profit. A crop of Sweet Clover plowed under is equal to 25 big loads of manure per acre. It stores nitrogen in the soil. It supplies enormous quantities of humus. The big powerful roots go down deep. They break up hard sub soils. When plowed under they decay quickly. The roots and tops soon become a part of the soil. Heavy soils drain better and are easier to work. Sandy soils have their water holding capacity increased. You can notice the effects of the crop for several years.

Sweet Clover is a wonder worker and a money maker. It can give you quick results. Sow this spring with small grain. Pasture it this fall. Plow it under next spring just before corn planting time. Thousands are using the crop in just that way. It's miraculous fertilizing value will amaze you.

Very Valuable Pasture

Sweet Clover has a tremendous capacity as a pasture crop. Can be pastured the first fall. The second year you can hardly stock it heavily enough to keep it down. Will carry one to two head of cattle in the fall and three to four head per acre for second year. You can put hogs on in addition. If it grows too fast it can be clipped back. Less danger of bloat than with most clovers. If cattle have access to a straw stack there is practically no danger at all. Provides pasture during hot dry months. Sweet Clover is high in protein. Cuts down on grain. Reduces costs of animal production and all the while it's building up your land.

Other Points of Value

Sweet Clover generally makes a hay crop first year if not pastured. Two hay crops can be secured second year. Cut as soon as buds appear. Leave a high stubble for second crop. Sweet Clover is also a good seed producer but its greatest value lies in pasture hay and fertilizing. Properly cured Sweet Clover hay is practically equal to Alfalfa in feeding value.

Sweet Clover is a great drought resister, remaining green under very unfavorable conditions. Sow fifteen pounds per acre on firm seed bed, cover lightly. May be seeded just like red clover.

Blackstone, Va.

Gentlemen: I have used your seeds for many years with satisfaction. The quality has never disappointed me. The price, excellency of the seed considered, has been much lower than I could secure elsewhere.

Very sincerely,
BENJ. R. MORSE.

3 WORLD BEATERS

SWEET CLOVER

BLUE RIBBON BARGAINS

LOT GROW-MORE

**LOWEST
PRICES
in HISTORY
ON
SWEET
CLOVER**

Extremely Low Price—Extra Good Values

This lot stretches your money over more acres than any other. You receive a dependable seeding too. That is why it is such an exceptional bargain.

This is the Big White or Common Sweet Clover. It has been scarified by the famous Eddy process which is far superior to any other method. All our scarified Sweet Clover is handled over this machine. It gives higher and stronger germination. Very few seedsmen use this method. Some do not scarify at all.

**\$2.90
PER
BU.**

Very Carefully Prepared

Lot Grow-More is a product of the modern efficient Ferrell cleaning and grading machines. Carefully cleaned and scientifically graded, it is a reliable value. Its appearance isn't quite as nice as our best grades, but it will give entirely satisfactory results. The purity and germination tests are good. Some of the berries are a little smaller. The color is a little below our high standard. There are more seeds per pound. It performs right along with better grades.

This Grade in Big Demand

We have many customers who demand this kind of seed and have sold it for many years. These farmers judge by results only. The price this year is so sensationally low that everyone can afford to sow it. No other clover seeding is as cheap. Never before have you been able to buy so much value for so little money. Such a bargain will go fast. Place your orders early.

We guarantee complete satisfaction. Return it if you are not thoroughly pleased with your purchase.

**LOT
BEAT-EM-ALL**

**\$3.20
PER BU.**

An Astonishing Bargain

You will find further proof of our leadership in the Sweet Clover industry in this attractive bargain. Not quite so fine as Lot Beauty. Somewhat larger berries and a little better color than Lot Grow-More. It is the straight common or big White Sweet Clover. This is the grade that a good many dealers sell. It is nice clean stock. Our seed is scarified by the Eddy process, making it a superior product.

Saves You Money

This lot, like every other in this book, is guaranteed to save you money. Return the seed and get your money back if you don't consider it an exceptional bargain. This seed is absolutely reliable. With good seed so cheap you will find it good business to sow a large acreage to Sweet Clover. Your land needs such a crop. Good farming demands clover. Start this money-making crop. Use it for pasture and hay. Cash in on its great soil building power.

Your cash outlay is small when you use such seed. You will be getting something thoroughly reliable and you'll make some money. This bargain will "Beat-'em-All."

LOT BEAUTY

See Sample Enclosed

Here is a magnificent value. Look at the enclosed sample. There is quality better than many sell as the best. Note those nice plump well developed berries. See the bright color and note how clean the seed is. It is beautiful seed. High purity and germination. "Eddy" scarified. Put into first class shape. No seed could give you better assurance of success. It is as safe and sure a seeding as you can make. Such seed is always economical.

**\$3.50
PER BU.**

Prices at New Low Levels

All our Sweet Clover prices have hit rock bottom. We guarantee that they will not go lower. Already the general market has advanced materially above the low point. We bought liberally at the lowest figures. We knew the seed crop was shorter and that the demand would be tremendous. You are getting the full benefit of our early buying by ordering at these prices. The saving goes to our customers. This extraordinary bargain Lot Beauty is proof of that. It is the big White variety.

Investigate, compare. This seed is sold under an absolute guarantee to save you money. Consider quality and you will find it an unbeatable value. We have a good supply to start the season. You can get it at this price as long as there is any left. Our advice is to order early.

Binghamton, N. Y.
Dear Sirs: I have used your seeds for some time and I have had good results. I have used other seeds, but they are too high. I save about a third in buying from you and get better results.

Yours truly,

MIKE ZOPP.

LOT GOLD

\$ **3.50**
PER BU.

The Finest Yellow Sweet Clover

A magnificent value. A wonderful bargain. The pure, leafy, finely stemmed yellow Biennial. Extra fine quality seed. The cream of the crop. You will find few, if any, lots to equal it, none better. It will satisfy you no matter how hard you are to please. It's the best that nature, plus improved cleaning and scarifying machinery, can produce.

Price Extremely Low

Consider its extra fancy quality. Then judge the value by our price. It's the lowest price ever made on such seed. We guarantee it to be a lower price than you can get anywhere this season on such quality. Chances are you will not find a quality to match it. This is the seed for those who want the best that can be bought, at absolute rock bottom prices.

A Fine Variety

Very popular for hay because more leafy and finer stemmed. Extensively used for pasture. A fine soil builder. Not so coarse as common white. Because of earlier maturity may be grown further north or wherever 10 days' earliness is desired.

Lakefield,
Minn.

Dear Friends:
I like your seeds and recommend them to others. Your seeds do well in this section. I save money by buying from you. I am well satisfied and am sure other farmers will, too.

Yours truly,
JOHN GREIN.

The Finest Seed That Grows

Our price on this seed is extraordinarily low. The seed is the best you can buy. This combination of highest quality and low price makes a real bargain. Strictly extra fancy seed. The finest color and highest germination. Exceptionally clean and pure. Well developed, fully matured and uniformly high quality throughout. Your local dealer unquestionably will ask you more money but he can not sell you nicer seed. In fact, most of them will not offer you such quality. Get a sample for comparison. It will tell you the story in a most convincing way. It will prove our values sensational.

Grundy County a Popular Variety

There is an ever increasing call for Grundy. Especially in great demand where the common or Big White grows too tall or coarse. It is cheaper to sow because the seed is smaller. Takes 12 lbs. per acre compared to 15 lbs. of common. Lot Excel is guaranteed the finest value obtainable in Grundy County seed.

LOT PREMIUM

Makes Dollars 25% Larger

A high quality lot priced still lower. We bought it a little cheaper because it had some yellow sweet in it. Only about 10 percent.

The mixture doesn't hurt it for practical purposes. A good many farmers prefer to have it mixed. They say it gives better variety in feed because the taste is a little different. Being lower in price the seeding cost is reduced yet equally satisfactory results obtained.

A Very Attractive Bargain

Lot Premium is a matchless value for the money. Good color. Very free of weed seeds. Scarified by the Eddy process. High germination. A thoroughly reliable and serviceable seed. We stand back of it with our strong guarantee assuring you complete satisfaction and a handsome saving. Gives results equal to the finest lots of straight White or Yellow yet it costs you less to sow.

We are in constant touch with markets and are quick to snap up bargains that will please our trade and give them an extra saving. This lot is one of those "snaps." You share the saving. It gives you more real reliable value for your money. Buy it while we have it. You will profit by doing so.

ALSIKE CLOVER

LOT ECONOMY

\$6⁶⁰ PER BU.

Fine Seeding at Low Costs

You can sow this remarkable crop at a cost of but slightly (more) than a dollar per acre. A bushel sows 6 to 8 acres. It is one of the surest seedings you can make. We have slashed the price of this seed to new low levels. Lot Economy always has been one of our outstanding bargains. At this drastically low price it is a surprising value.

Alsiike is a perennial clover. One seeding lasts several years. Grows on all soils except very dry ones. Seed is very small and goes a long ways. Almost sure to make a stand. Best clover for wet or sour land. Fine in hay or pasture mixtures. Higher in feeding value than Red Clover.

Description

Lot Economy makes a cheap seeding yet a very good one. We secured this seed at a most attractive price because it contains some Timothy. That makes a wonderfully productive seeding but can be purchased for less because it is mixed. Runs over half pure fine Alsiike. When sown at 10 lbs. per acre gives 80 Alsiike seeds per square foot. At 8 lbs. per acre, 60 Alsiike.

Do not confuse this with the ordinary mixture of Alsiike and Timothy. It is a far different article. Sells at 60 lbs. per bushel. You can cut your seed bill 20% to 30% by using Lot Economy. It's guaranteed to satisfy you. Your money back if you can duplicate it anywhere. It's nice, clean, high germinating seed.

LIFE SAVER PASTURE COMBINATION

Alsiike and Sweet Clover

This is the richest heavy producing combination for pasture that we know of. It makes good hay, too. The cost of seeding is low. Sow 10 to 12 pounds per acre. Seed runs 60 pounds per bushel. It sure is a wonder for production. Sweet Clover alone is a heavy yielding pasture. By adding the Alsiike you add an enormous amount of rich, luscious undergrowth. You can turn an almost unbelievable amount of stock on such a pasture.

$\frac{1}{4}$ Economy Alsiike — $\frac{3}{4}$ Sweet Clover

The Lot Economy Alsiike described above is combined with Sweet Clover to make this wonderful value. There are about 3 times as many Alsiike seeds per pound as there are of Sweet Clover. Therefore, this seeding will give you about a 50-50 stand. The Sweet Clover seed is scarified, high testing seed. It makes a most remarkable combination that is practically sure to make a stand.

The big demand for it shows the popularity of it and our new low price will save you 20% to 30%. Stretch your dollars by using Lot Life-Saver.

Dorset, Ohio.
Dear Sirs: I have been using your seeds for years back and I find them the best seeds I can buy. I have saved money on the seed orders I purchased from you. I gladly recommend you as reliable company to deal with.

Yours respectfully,
LAWRENCE S. GIDDINGS.

\$4⁵⁰ PER BU.

LOT ALSIKE MERIT

Extra Value at Low Cost

Again our customers share in an exceptional purchase. This low price on this fine seed is possible only because we had ready cash to snap up two cars on a quick deal.

\$8⁰⁰ PER BU.

It is a fine lot of Alsiike containing a small percent of White Dutch Clover, and Timothy. For all practical purposes it is just as good as pure Alsiike. In fact, we prefer a little mixture to help hold up the Alsiike. Runs over 90% pure Clovers. Lot Merit is one of the most nutritious seedings. It's well re-cleaned. No harmful weed seeds in it. Strong growing power. One bushel sows 10 acres. You will find our quotations on pure Alsiike on page 24. If you don't object to a very light mixture you can make a big extra saving on this lot. It's a wonderful value and guaranteed to satisfy.

LOT SURE-GROW COMBINATION

Alsiike and White Dutch Clover

\$9⁶⁰ PER BU.

The two easiest clovers to start and the finest for pasture. White Dutch Clover is comparatively high this year. This Alsiike and White Dutch were grown and harvested together. The seed cannot be separated. Because of this you can buy it for less than the cost of Alsiike alone. The seed has high purity, very free of weed seeds. Very cheap to sow. Only takes 5 to 6 pounds per acre. There are 60 pounds per bushel. We have sold a similar lot for the past two years. It is very popular and in heavy demand as a safe, sure and economical seeding. Fine for top seeding on pastures or to mix with grass for pastures or meadow. Order it now and share-in this great bargain.

HUBAM

1/2 LOWER PRICES

The Wonder Working Annual or One Year White Sweet Clover

We have slashed the price of this seed to half of last year's price. It is now ridiculously cheap. Just a few years ago it sold for more per pound than you now pay for a bushel. Now is the time to get started with this great crop that has changed farming practices in so many places.

Cash in on the added profits Hubam can make for you. Put this great soil-building force of nature at work on your farm. It costs but little and does much.

Does Two Years Work in One

With Hubam you can work your land harder and still keep it in excellent fertility. It is no longer necessary to hold clover over a second year. Sow it with grain in the spring. Plow it under the same fall. You add enormous quantities of humus and nitrogen to the soil. Your land is ready for a cash crop again next year.

Other Values of Hubam

You can get two cash crops a year with Hubam. Your small grain first, and then a seed crop of this clover. Produces up to 600 pounds of seed per acre. Sometimes more. You can pasture it after the grain is off. It carries a heavy load. Generally if pastured until fall it will reseed itself for next spring. If no reseeding is desired plow it under when it begins to bloom.

Hubam also makes a good hay if cut when it begins to bloom. The feeding value is excellent, practically equal to Alfalfa. In manner of growth it appears identical to common White Sweet, although not as coarse. It is also an excellent bee pasture.

Lot Marvel Extra High Grade

This beautiful value is a great bargain. The quality is the finest you can find. High colored, plump, fully matured, berries. Thoroughly re-cleaned and scarified. Excellent purity and germination. This is strictly extra fancy seed. It will give you the best possible assurance of success. It is pure genuine Hubam. We are selling this fine quality at a price that we guarantee lower than any other obtainable on such fine stock. You will be highly pleased with the seed and you will be convinced that you have made a substantial saving. If you find the shipment otherwise you can return it, and money, plus freight, will be promptly refunded.

Hubam will make you money. Put the crop to work for you. Sow this spring. Cash in on it this fall.

LOT
MARVEL

\$5.70
PER BU.

DALEA

or WOODS CLOVER

A Great Soil Builder

The Clover that grows on sour soil

This is a remarkable crop. A one year or annual clover. A wonderful soil builder. Too bitter for pasture, but a great nitrogen gatherer. Flourishes on land too sour for other clovers. Grows without lime. Sow in the spring, but not too early. Some sow at same time of spring grain. Others after grain is up, harrowing it or letting rains cover the seed. May also be most successfully sown alone. May be sown as late as July 15th. Seed shaped like Red Clover, but larger and grayish brown in color. Use 15 pounds per acre. Inoculate your seed. Seed runs 60 pounds per bushel. Plow under the same fall. Does not live over winter.

Dalea may be saved for seed crop. Yields 5 to 8 bushels per acre. Good demand for it. Crop grows up to 36 to 42 inches high. Enriches the land with humus and nitrogen. Crop comparatively new. Seed still scarce. Our prices reduced in spite of short crop. Seed all scarified and thoroughly cleaned. A high quality product free of all noxious weeds. Better order Dalea seed early. Ours is a bargain price. Good as long as supply lasts.

\$5.90 PER BU.

North Liberty, Indiana.

Dear Sirs: Your seeds are the best I ever used. The Yellow Biennial Sweet Clover is certainly the best. Every seed came up. I am well satisfied and can recommend your seeds highly.

Yours truly,
ELDEN KANE.

KOREAN CLOVER

\$4.50 per bu.

**Great Pasture and Soil Builder
for Poor Sour Soils**

**A Larger Growing, Earlier Maturing
Type of Lespedeza**

Especially adapted to the southern half of the United States but in recent years working its way into Iowa, Illinois, Indiana, Ohio and Pennsylvania. It is the salvation of poor soils. The reclamer of abandoned farms. It is an annual clover but maintains a permanent stand by reseeding no matter how closely it is pastured. Easily eradicated. Makes fine hay in the south and excellent pasture further north.

Price Cut in Half

The tremendous demand for this seed has kept prices at fairly high levels. This year we are cutting our prices in two, making it available to more farmers who want to grow this great crop. See prices below. Seed weighs 25 lbs. to the bu. Sow 12 lbs. per acre. Our seed is all new crop and high quality. Write for free circular giving full detailed information on Korean Clover. Place orders early. We guarantee our seed satisfactory and price low.

Small lots postpaid, 1 lb., 35c; 5 lbs., \$1.50

\$4.50 PER BU.

LAWN GRASSES

Our lawn grasses are made up of clean, high germinating seed. Considering quality our prices are very low. You'll save money by using such seed.

Extra Choice Lawn Mixture. For general corn belt conditions. Contains chiefly Blue Grass, Red Top, White Dutch Clover and Rye Grass. Coarser grasses disappear after slower growers get started. This is our most popular mixture. We sell lots of it. Is reasonably priced and gives satisfactory results.

Postpaid prices: 1 lb., 40c; 3 lbs., \$1.00; 5 lbs., \$1.50; 10 lbs., \$2.80.

Shady Spot Lawn Mixture. Contains grasses naturally adapted to growing in shade. Fine for grounds shaded by trees or buildings. Same price as Choice Lawn Mixture.

Special Terrace Mixture. Contains deep rooted grasses that hold soil firmly. Best for sloping places and terraces.

Postpaid prices: 1 lb., 50c; 3 lbs., \$1.35; 5 lbs., \$2.00.

Southland Lawn Mixture. Contains grasses adapted to the south, including Bermuda Grass and Southern Blue Grass. Makes a beautiful lawn. Price same as Special Terrace Mixture.

CRIMSON CLOVER

\$6.50 PER BU.

Or Giant Incarnate

A winter annual. Sown in the fall in southern states where it lives over winter. Sown only in the spring in northern states. Good producer but does not make nearly as large a growth as other annual clovers such as Hubam. Makes good pasture in the north and hay crop if weather is not too hot. Good soil builder. Seed much larger than red clover. Sow 15 pounds per acre. Seed weighs 60 pounds per bushel.

Our seed is of the reddish type which is distinctly superior to the straight yellow type. All high quality and priced to save you some money.

Small lots postpaid, 1 lb., 30c; 5 lbs., \$1.25.

JAPAN CLOVER

This is the common Lespedeza. Similar to Korean. Growth shorter and matures later. Grows on poor sour soil. Builds up fertility. Makes good pasture. Will not reseed itself in the north. Sow 12 to 15 lbs. per acre. A bushel weighs 25 lbs. Much cheaper in price than Korean. Our prices have been drastically reduced. Seed, new crop; thoroughly cleaned and high quality stock. We will save you money and give you satisfaction. See page 24 for prices.

Small lots postpaid, 1 pound, 30c; 5 pounds, \$1.25.

WHITE DUTCH

The small white clover so popular in lawns and pastures. Fine for top seeding on old pastures. Increases production. Improves feed value. Seed very small. Four lbs. per acre makes a good seeding. Drought cut seed supplies very low. Our price on high quality seed very low in spite of seed shortage. We have a dandy value for you in this seed. See page 24 for prices.

Price on small lots, Postpaid, 1 lb., 60c; 3 lbs., \$1.65; 5 lbs., \$2.50; 10 lbs., \$4.75.

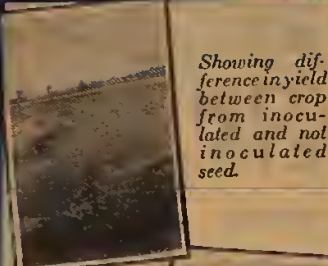

Dear Sirs: I have used your seeds for fifteen years and have found them the best for the money. The Berry Seed Co. has saved farmers thousands of dollars by selling good seeds at popular prices. They are reliable.

Yours, M. A. McNEAL.

Watson, Missouri.

INOCULATE ALL LEGUMES

Showing difference in yield between crop from inoculated and not inoculated seed.

The cost per acre is small. The extra returns are large. Bigger yields and better soil building.

Inoculation Necessary

No legume can flourish without proper inoculation. Often the lack of inoculation means a failure. This applies to all clovers, alfalfa, peas, beans and vetches. The same inoculation does not answer for all. There are several distinct species. Therefore land may be inoculated for one legume and be utterly lacking for another variety.

You may have inoculating bacteria in your soil. If a certain legume has been growing successfully on your land in the past few years, then it is reasonable to assume that you do not have to inoculate the seed of that crop when you reseed. If such a crop has not been grown recently on your land, there is no way of telling if it is inoculated.

Don't take chances. The acre cost of inoculation is a minor item. If you neglect to inoculate you may lose your seeding because of it. Inoculation puts live bacteria on your seed. They go into the roots after the seed sprouts. Then and then only can your legume plant take nitrogen from the air for its own growth and for soil building. Without inoculation the plant uses up the nitrogen in the soil and then generally turns yellow and dies.

We sell inoculants that are guaranteed satisfactory. Your money back if they fail to do their work properly. See column on opposite page.

ALFALFA

We guarantee our Alfalfa values to be the finest bargains obtainable anywhere.

LOT MORE HARDY

Half Grimm

U. S. Verified Origin Seed

The Lowest Priced Super-Hardy Alfalfa

\$7.50
PER BU.

During the past years we have been able to secure for our customers some Grimm Alfalfa at a very low price. It contains some Northern common hardy and on account of not being straight Grimm can be secured at a big discount. This seed has given wonderful satisfaction. It is one of the most popular values we ever sold. You can cut your Alfalfa seed costs extremely low by using this seed. It produces stands that give lasting results. Big yields and fine quality

Most for Your Money

Lot More Hardy is seed that has good purity and germination. It is free of noxious weeds. It is over half Grimm; balance hardy northern. The berries are a little smaller than the best grade. It contains some off colored seeds, but it is good reliable and serviceable seed. Customers report getting better results from it than from seed, purchased elsewhere, costing twice as much.

Truly, it is an amazing value. A real bargain. Any farmer wanting to save every possible dollar will take advantage of this sensational offer. There is a lot of extra satisfying value in this lot.

U. S. Verified Origin

All of our Alfalfa seed is U. S. Verified Origin or State Sealed stock. A red, white and blue Verified Origin tag on your bag means that you can absolutely depend upon the seed being grown where the tag says it was. The U. S. Government checks up on this to protect you. We are "authorized" dealers in such seed and all our seed and records are checked directly by government men. Insist on U. S. Verified Origin Alfalfa seed.

Value of Alfalfa

It will make you more money than any general farm crop you can grow. Produces on the average three cuttings per year, going better than a ton per acre per cutting. It is the best hay you can have. Feeding value extra high. All kinds of stock, even hogs, eat it with a relish. They thrive on it. Reduces cost of growing stock. Increases milk production.

It is a great drought resister, making hay when other crops fail. It is a wonderful soil builder, adding large quantities of humus and nitrogen. Its roots go down ten to twenty feet, touching plant food that other crops cannot reach.

Alfalfa is easy to grow. Sow in spring on a well prepared and well drained seed bed. Use a light crop of spring grain and 15 pounds of Alfalfa per acre. Cover seed lightly. Do not sow as early as Red Clover. When sown after May 1 to 15th sow without a nurse crop. Inoculate your seed. See pages 24 and 25.

Chippewa Falls, Wisconsin.

Gentlemen: My father used your seeds for 30 years and would never think of planting any other seeds than Berry's. I have been farming for 14 years and always bought my seeds from you. The seeds always come up, have strong hardy plants and bear excellent crops.

Yours truly,
WM. E. KLEMEKE.

LOT

HONEST JOHN

\$5.90
PER BU.

An
**Extraor-
dinary Bargain**

Good re-cleaned serviceable hardy seed priced extremely low. Absolutely the lowest figure at which you can buy dependable seed of this character. U. S. Verified Origin seed. Good purity and germination. No noxious weed seeds. A little off colored. Grows good. Produces beautiful stands of vigorous growing Alfalfa. If you do not object to a little lack of uniformity in looks so long as the seed is clean and will grow and produce a hardy stand, then this is your best buy. We sell thousands of bushels of this quality.

When these customers want more seed they call for Honest John. It gives them satisfactory results and saves them a lot of money. It's guaranteed to satisfy and will start you with the great money crop at small cost.

LOT DRY LAND

Nebraska—

Kansas Seed

Highest Quality.

U. S. Verified Origin

\$8.90
PER BU.

The demand for this seed has shown a surprising increase in the past few years. Even northern customers in Wisconsin, Michigan, and New York are calling for it. While grown further south it comes from sections often having extremely severe and damaging winters. This stock survives in good shape and this hardy dryland seed is an excellent product.

Lot Dry Land is the very highest quality seed. The most particular buyers will be pleased with it. Extra high purity and strongest germination. Free from all noxious weeds. Big bold berries. Fine bright golden yellow color. You will be delighted with the quality. Our extremely low blue ribbon sale price gives you the finest quality at the lowest possible cost. Guaranteed to satisfy and save you money.

EXTRA HARDY ALFALFA

LOT DAKOTA

\$ 9⁹⁰ PER BU.

Fine Extra Hardy Alfalfa Price Greatly Reduced

A high quality value at a low bargain price. Most everyone knows about the superior quality of this Dakota No. 12 Alfalfa. Agricultural authorities recommend it. Growers are enthusiastic about its yield, quality and extra hardness. Our seed is U. S. Verified Origin stock. Genuine Dakota No. 12 grown in Dakota. Our seed comes direct from farmers through our buying organization. By eliminating extra profits we can sell this seed at this extremely low price that means a big saving to you.

The quality of Lot Dakota will please you. Better than many dealers sell as the best. Just lacks a trifle in color of being our World Brand grade. High purity and germination. You can depend on the quality as being absolutely satisfactory in every respect. No seed could do more for you. We guarantee this to be the lowest price available on such fine quality seed. A saving of at least \$2.00 per bushel is assured to you. This lot permits you to start this wonderful variety at a very low cost.

When you receive your shipment of this seed you will have just cause to be proud of your purchase. When you sow it you will have the assurance that you have started with a fine extra hardy variety of Alfalfa.

**FINEST
QUALITY**

Lot BRIGHT

Finest Nebraska Grown U. S. Verified Origin Seed

Straight Nebraska grown seed is hardy and is always in big demand but not always obtainable in large quantities. This year we perfected our buying organization in this state and have this beautiful high grade lot to sell. And, we are selling it at a bargain price.

You'll be delighted with the high quality in this hardy type. It is strictly World Brand grade. Ranks A1 in purity, germination color and size of berries. There is nothing better in Nebraska seed. Guaranteed to satisfy the most exacting and to save you money. Return it and get your money if you are not perfectly pleased.

Anyone wishing genuine Nebraska alfalfa can do no better than buy this Lot Bright. You'll get your money's worth, and then some. We endorse this bargain and recommend it.

\$ 9⁰⁰ PER BU.

Ashville, N. Y.
Dear Sirs: I have always found your seeds to be very satisfactory and have gotten good results from them. I recommend your seeds highly at every opportunity.

Sincerely,
CARL A. C. JOHNSON.

99^{1/2} PURE

MONTANA VARIEGATED

\$ 11⁷⁰ PER BU.

A Most Sensational Bargain

When you see the seed you will agree with us that it is a magnificent value. Fully equal to Grimm in hardness and production of fine quality hay. Has variegated blossoms and branching roots. We don't believe there is a man living who could tell the difference between a field of our Montana Variegated and a field of Grimm. This seed was grown in Montana. It is U. S. Verified origin stock. Purchased direct from growers by our resident buyer. We know exactly what kind of seed it is. Comes from fields that have been standing 20 to 40 years. Sold to you at one small wholesalers profit. No jobbers or retailers to add to the cost.

Extra Fine—Highest Quality

It's the finest seed that money can buy. Beautiful color. Large berries. Extra high purity and germination. Free of noxious weed seeds. Far superior to the average best seed. It is as fine as nature and improved cleaning machinery can make seed. Guaranteed the finest value in Alfalfa seed to be found anywhere. Permits you to sow the very highest quality seed of a super hardy variety at a cost very little above that of common hardy. Our direct-to-farmer method saves you \$2.00 to \$3.00 on each bushel. You will get extra high quality at very low cost in this remarkable bargain.

LOT MONTANA

Fancy Montana Grown U. S. Verified Origin

We rank our Montana common along with Dakota No. 12 for winter hardness. Alfalfa in Montana must be hardy or it cannot survive to make seed.

Our stock comes from old established fields. Lot Montana is extra hardy. It is a remarkable value at this bargain price. Not quite as highly colored as the Montana Variegated described above. Fully equal to the average best. Strong germination; high purity; no noxious weeds. You will find it a much higher quality than the price indicates. We are out to smash all records of value giving in our Blue Ribbon Sale. You get a lot of extra value in Lot Montana. You will receive seed that produces lasting satisfaction. There are four good acres of extra hardy Alfalfa in every bushel.

\$ 9⁶⁰ PER BU.

GRIMM ALFALFA

At STRIKINGLY LOW MONEY SAVING PRICES

LOT
GOLD SEAL \$ **12⁰⁰**
SEAL PER BU.

Idaho State Sealed and Certified Blackfoot Section Grimm 98½% Pure 88-92% Germination

Fine, super hardy, state sealed and certified Grimm. Produced on the best fields, inspected both by state authorities and the Blackfoot Association. The fame of this Grimm has spread nationwide. Everyone who knows Alfalfa values will be quick to appreciate this money-saving opportunity. It is thoroughly reliable and dependable seed in every way. There is no seed that could do more for you or that would give you better satisfaction than Lot Gold Seal.

Good color, purity and germination. Free of noxious weeds. It is a wonderful value. You can find Grimm selling at higher prices but none of it will give you better results than this matchless bargain. The color is not quite so bright as the extra fancy grade. The seeds are smaller. There are more seeds per pound, therefore it goes further. There is a big extra measure of value in Lot Gold Seal.

Demand for Grimm Increasing

More and more farmers want Grimm. No one questions its super-winter hardiness. During mild winters there is not so much difference but after a severe winter with light snow protection the superiority of Grimm is emphatically demonstrated. Then is when you appreciate its extra value. When winters damage common Alfalfa it means thin stands the next year and probably a new seeding. That means expense and loss of the use of the land. It is then that you realize the economy of Grimm. The increase in yield is then large enough to pay the full cost of sowing the crop. Grimm gives you practical assurance against severe winter killing.

**STATE
SEALED
AND
CERTIFIED
GRIMM**

Lowest Prices on State Sealed Grimm

Again our customers save money because of our direct buying connections in the Blackfoot producing section. Our prices are the lowest at which such fine quality seed has ever been sold at. We guarantee all our Grimm prices to be the lowest obtainable, quality considered. See page 24 for prices on all grades of Alfalfa.

Our State Sealed and Certified Grimm all shipped in bags that are tagged and sealed by State authorities. Sometimes when an odd number of pounds are ordered it is necessary to break bags. We supply the genuine article of guaranteed quality at a price that will save you \$2.00 to \$4.00 per bushel. Get samples. Compare. See for yourself. Buy on the basis of guaranteed satisfaction and save money.

LOT "Bonafide" GRIMM

U. S. Verified Origin Alfalfa

This is another matchless value in hardy northern grown Grimm. Our buyers in Montana, Idaho and Dakota frequently find some lots of Grimm that because of some technicality or oversight have not been certified. It's just as fine Grimm as any. Just as dependable and serviceable. This desirable seed can be secured at a substantial discount. Thus we can give you extraordinary value at unusually low prices.

Lot Bonafide a Desirable Lot

This seed is a most reliable seeding. Good quality, re-cleaned and high testing. Not quite as smooth and uniform or as high color as our World Brand Grimm priced on page 25 but entirely satisfactory from a practical standpoint. Berries are a little smaller, therefore more seeds per pound.

\$ **1140**
PER BU.

Good Seed at Low Cost

At this bargain price you can sow Grimm this year for less than the cost of Common last year. Any customer who wants to start with Grimm can now do so at a very moderate expenditure for seed. We have sold this type of seed for many years and it gives excellent satisfaction. Never before have we been able to sell it at so low a price. It sure is a bargain.

Shipped in Sealed Bags

Bear in mind, this is northern grown Grimm. It's the best kind that withstands severe punishment. Produces heavy yields of fine quality hay. It is U. S. Verified Origin seed. Shipped in sealed bags for your protection. You make a big saving on Lot Bonafide.

**Order early and
save on this
lot.**

Myerstown,
Pa.

Dear Sirs: I have been getting my seeds from you for twelve years. I get the kind of seeds I want and save money. The Grimm Alfalfa I sowed in 1930 gave me three cuttings of fine hay this year.

Yours truly,
MILES L. RISSER

TIMOTHY LOT PURITY

Low Bargain Price Extra Nice. New Crop Seed

No one can afford to neglect sowing grass seed when a good high grade seeding can be made for around half a dollar per acre. That's all it will cost you when you use this new crop, triple cleaned, high testing timothy, Lot Purity. It is the cheapest good seeding of grass seed that you can make. You will find it a thoroughly dependable seeding too.

It is easy to get a stand when you use such seed. It has good strong germination. Timothy can be sown early. Stands a lot of early freezing. Likewise it will stand dry weather better than most seedings. It is seldom indeed that Timothy seed of this character fails to make a stand. Grows on most any type of soil. One seeding lasts several years. Perfectly winter hardy.

Now is a good time to sow more acres of grass seed. Give your land a rest. Get ready for larger crops later when markets are better. Keep your soil from washing. Sow grass seed while prices are so low.

One of Our Greatest Blue Ribbon Bargains

Our favorable location in the World's Largest Timothy seed producing section gives us a decided advantage in locating real bargains. Lot Purity is an example of the exceptional values our customers receive. All new crop, clean, live, solid seed. 99 1/4% Pure, 95% Germination. Triple cleaned over our new modern cleaning devices. Contains just a little more hulled seed than our World Brand grade (see page 24 for prices on all grades.)

This seed is a much finer quality than many dealers sell. It is the quality that makes it such a great bargain. We know it is a better value than can be secured elsewhere and expect to sell at least 25 carloads of this Lot Purity. Every customer who buys any of it is guaranteed a saving on every pound he buys.

55c Per Acre Cost

That's all it costs to make this fine seeding. A quarter of a bushel easily sows an acre. At that price you can afford to sow liberally. We have taken one of our high grade lots of all new seed and priced it down to a figure that halts competition. It makes your seed dollar bigger. Again we demonstrate that it pays to trade direct with the World's Largest Seed House, selling farm seeds direct to farmers.

This seed like all others is sold subject to our liberal guarantee. If after you get it you are not completely satisfied; if you do not feel you have made a big saving; send it back and get your money. Keep it 60 days if you wish to test it. We want you to be absolutely satisfied in every respect.

\$2.40
PER BU.
**99 1/4%
PURE**

PHALARIS OR REEDS CANARY GRASS

A Most Remarkable Grass at New Low Prices

The most valuable grass that has been brought to farmers in many years. It is not a new grass, but it is only in the past few years that its adaptation to various conditions and its great value have become well known.

Characteristics

It is a long lived perennial. Stands of it have been known to be established for 45 years. It makes a very dense sod, yet can be easily eradicated. Phalaris is very winter hardy. It can be grown anywhere in the Northern half of the United States. The growth is very leafy. It will grow on land that is flooded with water for long periods of time. On the other hand, on average farm land it will outyield Timothy, Bromus, Orchard or Tall Meadow Oat Grass. Even under drought conditions in Iowa it yielded over 3 tons of hay per acre. It is higher in feed value than most grasses.

Seed prices are much lower than last year. Write for free circular on Phalaris and learn all about this wonderful grass. Good money in seed crop.

Postpaid Prices: 1 lb., \$1.10; 5 lbs., \$5.00; 10 lbs., \$9.00; 25 lbs., \$20.00; 50 lbs., \$39.00; 100 lbs., \$75.00.

Stoddard, Wisconsin.

Dear Sirs: In the spring of 1931 I purchased some of your Lot More-Hardy Alfalfa at \$10.50 per bushel. I also used some high priced seed from another firm. All sowed on the same ground. Your seed made a good stand; the other failed. You saved me money and I got better results.

Yours truly, ALBERT J. JONAS.

MARVELOUS MIXTURE

Lowest Price Ever Made on This Great Seeding

Our Richest and Heaviest Producing Combination

You can search nationwide for bargains in desirable seedings without finding any to equal this. Our Marvelous Mixture has made thousands of enthusiastic friends. Its tremendous yields and the rich feeding value of the hay receives a hearty welcome on every farm. Year after year our sales on Marvelous grow larger.

It is always a good seeding. Always economical and now it is cheaper than ever. Cheaper in price and even better in quality. Smooth, clean, uniform, high testing seed. A combination designed to give you maximum production at the lowest seeding cost. Desirable, serviceable, practical. This great seeding is a wonderful bargain at this exceedingly low price. You will save money and get satisfaction.

Rich in Clovers

Fifty percent clovers. That gives the hay a high protein analysis. That makes it a soil builder. Clovers blended with Timothy to produce the heaviest yields. Red Clover, Alsike Clover, Alfalfa and Sweet Clover. All re-cleaned, tested and guaranteed satisfactory.

Your land needs clover. Good farming demands it. By using this mixture you get your clovers at low cost. We buy a good many lots of seeds grown mixed at prices sharply lower than separated seeds. Clovers mixed with Timothy. Alfalfa mixed with Sweet Clover. All good seed but bought at a discount. By mixing these lots we can sell this wonderful mixture at exceedingly low prices.

Marvelous Is a Money Maker

Surpasses all other combinations in yield. Our customers report 3 and 4 tons of cured hay per acre. It is justly called "Marvelous."

Marvelous makes fine pasture, supporting 3 head of cattle per acre with some hogs added. Keeps stock fat and sleek. It helps cut production costs on live-stock.

One seeding lasts for several years. It inoculates your land for a seeding of straight Alfalfa. Marvelous Mixture stores nitrogen in your soil and adds large quantities of humus. There are reasons, plenty of them, why this seeding is so popular.

Acre Cost Low

Twelve pounds of this mixture makes a good acre seeding. The acre cost is right around \$1.00. This is the best seeding you can make at that low figure. Sow it in the spring just as you would any grass or clover seeding. You are more certain of a stand from a mixed seeding like this. If conditions should be unfavorable for one of the crops you have the others to carry on.

We guarantee this seed to show up to your entire satisfaction and to be a matchless value for the money.

Clinton, Iowa.

Gentlemen: We buy seeds from you. Some years the bill runs over \$1,000.00. The quality of the seed holds us as a customer. Then, too, the price is always less.

Yours truly,

3 POPULAR MIXTURES

Our ready-mixed seedings are very popular. They give you a good mixture of clovers at very low cost. All seed has been carefully cleaned and tested. Every order is guaranteed to satisfy and to save you money.

ALSIKE AND TIMOTHY

No. 1

A Safe, Sure Seeding
Very Economical and Highly Satisfactory

You can sow this nutritious heavy yielding combination at a cost of but little more than straight timothy. Twenty-five to thirty cents per acre more for seed gives you a liberal seeding of this fine clover with your Timothy. Our blue ribbon sale price makes this one of our greatest bargains. You can save on your seeding costs by using it. You will get a seed value that gives lasting satisfaction.

Contains 20% to 25% Alsike

That is a very liberal mixture. Alsike seeds are small, less than half as large as Red Clover. It will give you as many clover seeds per acre as a 40% to 50% mixture of Red. When sown at 12 lbs. per acre you get over 40 Alsike Clover seeds on every square foot.

No seeding is easier to start than this. It lasts several years. Alsike and Timothy are naturally adapted to a mixture. They have similar soil requirements. They mature at the same time. They yield more together than either sown separately. The Timothy supports the Alsike, permitting it to make a taller, heavier growth. Alsike is a smooth stemmed clover. Not dusty like Red Clover and has a higher feeding value. It makes one of the nicest, finest, hay crops you can grow.

Saves You a Fourth On Seed Bill

We buy large quantities of Alsike and Timothy grown mixed. It is somewhat difficult to separate the two so we can buy it for considerably less than if they were not mixed. This seed we reclean thoroughly and blend it carefully. The product is a dandy clean lot of high testing seed.

This Lot Rich is one of our very best lots of Alsike and Timothy No. 1. You will find it an outstanding value for the money. You will like its quality. You will appreciate the big saving in seeding cost. Above all you will be delighted with rich heavy and profitable production this seeding will give.

It's a safe sure seeding at a bargain price.

Dalton, Ohio

Dear Sirs: I have been using Berrys seeds for many years, especially Red Clover. I have often compared with others, but find none to equal Berrys' for quality and price. This year I have the best stand of Red Clover in the community.

As ever, your customer,
S. J. KULA

4 WAY CLOVER & TIMOTHY MIXTURE

Alfalfa, Red Clover, Alsike and Timothy

\$3.90 PER BU.

A Very Popular Mixture. Highly Recommended. 45 lbs. per bu.

Contains 20% Clovers

We began offering this mixture two years ago in response to a demand from our customers. The orders for it have far exceeded our fondest expectations. Many farmers want some Alfalfa in their mixtures to get that crop started on their land. It is a very successful way too. Customers report excellent results. Gives a heavy production of fine hay.

This mixture is prepared by selecting some of our best lots of Clover, Alsike and Timothy mixed, and adding good, hardy, recleaned Alfalfa seed. This gives a first class seeding with fully 20% legumes at a sensationally low price. Requires only 12 lbs. per acre. Gives fine satisfaction and we guarantee to save you money on it.

ALSIKE and TIMOTHY No. 2

\$3.00 per bu.

A Great Value at Low Cost

Here is another money-saving opportunity. The lowest priced seeding with ample clovers in it. The same fine recleaned high testing seed that you will find in our No. 1 mixture. Contains a little less clover. Runs 10% to 15% Alsike which is ample to meet the requirements of many farmers. The small seeded Alsike goes a long ways.

This mixture yields heavily, far more than Timothy alone. The feed-value is much higher. It costs so little more to sow an acre of this mixture that it need hardly be considered.

Think rather of the greater value of the mixed hay crop.

There is true economy in taking the advantage of our bargain price. You make more money sowing mixtures.

Lot Super
Contains 30% to
35% Clovers

A New and Richer
Combination

This is a dandy. If you are in doubt as to what mixture you want to get, you will make no mistake in selecting this one. During the past few years the demand for Red Clover, Alsike and Timothy mixed has increased faster than any other. Our "Regular" mixture described below has been responsible for this big demand.

Now we have this better, richer mixture, Lot Super, that is even a greater value. At a small additional cost, you get more than double the amount of clovers. Sown at 12 pounds per acre, you get over 50 clover seeds on every square foot. Think of getting such a seeding at a cost of around a dollar an acre.

All Quality Seed

High germinating, recleaned, good purity. A seeding that is lacking in quality is never cheap. A mixture like Lot Super is a matchless bargain. We'll gladly send you samples to prove its worth.

You are almost sure to get a stand from this seed. If there are spots in your field not suited to Red Clover, the Alsike will come as it seldom fails to catch. The Timothy holds up the clover, permitting it to grow taller. The tonnage is increased. The quality is improved. We recommend Lot Super as a high class value that will satisfy you. Our Blue Ribbon bargain price saves you money. Get it. You'll like Lot Super.

SWEET CLOVER and TIMOTHY

\$3.00 per 50 lb. Bushel

Contain 50% Sweet Clover, Balance Timothy

We have a steady call and ready sale for this combination. In a mixture the Sweet Clover seems to grow somewhat finer. It makes a better sod and stands pasturing better.

In this mixture we have blended a nice quality of scarified Sweet Clover with an equally high grade of Timothy. You can rely on this mixture. It is carefully tested, and fully guaranteed seed.

The price is ridiculously low. The lowest ever made. Costs only around 75c per acre for seed. Sow 12 to 15 pounds per acre. You are buying it for less than the cost of production. Our direct-to-farmer sales gives you the benefit of the very lowest price levels. Guaranteed the greatest value in its class obtainable anywhere. We give you the saving plus dependable quality.

RED CLOVER and TIMOTHY MIXED

An Exceptional Value

An old favorite that is always good. And look at our price. It smashes records for value giving. All fine recleaned seed. Contains 12% to 18% Clover. A bushel sows four acres. Plenty of clover to give a good stand in the timothy. Costs but little more than Timothy alone. Yields heavier and is worth more per ton. Better for your land.

We have bargains in Timothy too, see page 29. Unless you are just forced to economize on every penny it is the part of wisdom to sow such a mixture. When you figure it down to cost per acre the difference is really very small. Our Red Clover and Timothy mixture pleases our customers. We sell many cars of it each year. At our present low price it is more desirable than ever.

RED CLOVER-ALSIKE and TIMOTHY MIXED REGULAR

45 lbs. per bushel. Bags Free
A Seeding That Satisfies

This mixture contains the same fine quality guaranteed seed that is used in Lot Super described above. Contains less clovers 12% to 18%. It is also materially lower in price. This "Regular" mixture is the one on which we made such phenomenal sales records during the past three years. The results secured from it have raised it high in popular favor. With two kinds of Clover you have better assurance of a clover stand and generally a heavier yield.

A Saving Guaranteed

We guarantee, of course, safe arrival and satisfactory quality on every shipment. We go further than that, and guarantee to save you money. You can make your own decision on that. If you don't think you have made a worthwhile saving you can send the seed back and get your money, plus freight, promptly refunded. We know this kind of seed will make you want to come back again when you need more seed.

more, 10c each.

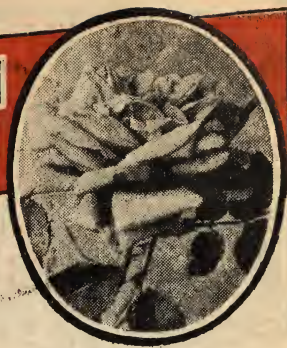

MONEY SAVING PRICES

BARGAINS IN

ROSES

FLOWERS

OF RARE BEAUTY

The varieties listed below are selected for their beauty and their adaptability to the needs of our customers. The Tea Roses do best with some protection over winter; all other varieties are very hardy. The stock is strong and healthy and of the size that usually starts the easiest and gives the most satisfactory results.

Hardy Hybrid Perpetual Roses

Postpaid, 3 for 89c; 6-\$1.69; 10-\$2.49

RED

- 2100 Anna DeDiesbach. Rose red. Especially fine in the buds.
2101 American Beauty. The queen of crimson flowers.
2102 General Jacqueminot. The flaming Rose of Romance.
2105 Ulrich Brunner. Cherry red, a rare color, large petals.

PINK

- 2104 Paul Neyron. Bright rosy pink, the largest rose known, often as large as a saucer.
2107 Mrs. John Laing. Large pink flowers. Extremely fragrant, borne on long stems.
2109 Georga Arends. Large flowers, borne singly on the point of stem.

WHITE

- 2103 Frau Karl Druschki. Acknowledged by all to be the most perfect white.
2108 Margaret Dickson. White with flesh center.

YELLOW

- 2106 Soliel D'Or. Golden yellow shaded nasturtium red.

Hybrid Tea Roses

Postpaid 3 for 89c; 6-\$1.69; 10-\$2.49

Your Selection

RED

- 2111 General McArthur. Brilliant crimson, splendid for bedding.
2113 Gruss an Teplitz. Red rose in a class by itself, because it bears three times as many blooms as any other. Ironclad for hardiness.
2116 Mme. Edouard Herriot. Buds are coral red and the open rose a lovely apricot.
2119 Red Radiance. Pure red; foliage growth and habit same as in the parent Radiance.
2122 Crusader. Rich, velvety crimson.

PINK

- 2115 Killarney. The beloved Irish rose, especially beautiful in the bud.
2117 Ophelia. A delicate salmon pink toned with rose. A flower that excites the admiration. Flowers open full and double. Blooms profusely all summer.
2121 Los Angeles. The long pointed buds open into beautifully formed flowers rich in fragrance. Flame pink, toned with coral and shaded with gold.
2123 Columbia. Large. Peach blossom pink.
2124 La France. Bright satiny pink.
2125 Mme. Butterfly. Pink shading to golden yellow.
2126 Mme. Caroline Testout. Satiny pink and silver.
2127 Pink Radiance. Brilliant rosy carmine pink.

WHITE

- 2114 Kaiserin Auguste Viktoria. Pure white and a time-tried favorite.

YELLOW

- 2112 Golden Emblem. Best yellow bloomer; blooms constantly.
2118 Sunburst. Brilliant, orange-copper; long stemmed, vigorous.
2120 Lady Hillingdon. A fine, free flowering rose. Has long, pointed buds. Colored a deep apricot yellow shading to orange.

Hybrid Rugosa Roses

3 for 89c; 6-\$1.69; 10-\$2.49, Your Selection

- 2150 Belle Poitevine. Blooms are large and full, petals gracefully incurved. Bright, clear lively pink.
2151 Hansa. Double reddish violet, flowers of large size. Hardy.
2152 Sir Thomas Lipton. White, double flowers. A continual bloomer.
2153 F. J. Grootendorst. Beautiful small red flowers. Blooms all summer.
2154 Conrad F. Meyer. Double, clear, silvery rose.

Hardy Climbing and Rambler Roses

Your Selection. 3 for 89c; 6 for \$1.69; 10-\$2.49

RED

- 2131 Excelsa. Red, double glossy foliage which never mildews or spots. Extremely vigorous.
2133 Crimson Rambler. One of the oldest and best.
2134 Paul's Scarlet Climber. Rapid grower with wonderful double scarlet blooms.
2135 Seven Sisters. Varies from rosy red to bluish white.
2136 Climbing American Beauty. Silvery white with yellow stamens.

PINK

- 2130 Dorothy Perkins. Pink clusters of pink blossoms with crumpled petals, glossy foliage.
2137 Christine Wright. Bright rose pink.

WHITE

- 2138 Silver Moon. Silvery white flowers with yellow stamens.

YELLOW

- 2132 Gardenia. Best yellow, but not as perfect as the pink or red ones. Flowers are double.

Baby Ramblers

Your Selection. 3 for 89c; 6-\$1.69; 10-\$2.49

- 2142 Baby Dorothy. A prolific producer of pure pink flowers.
2143 Catherine Zeimet. Pure, snow-white, double in profuse clusters. Foliage dark glossy.
2144 Orleans. Brilliant geranium red suffused rose and deep cerise.
2145 George Elger. Golden coppery changing to clear yellow when in full bloom.

Vines Add Charm and Beauty

- 2801 Virginia Creeper or American Ivy. This is a favorite with many. Its deeply cut green leaves turn to crimson in the fall. Perfectly hardy everywhere. Grows in practically every soil. Must be tied up. Will not cling to walls. Price: 25c each; 3 for 70c.
2802 Bittersweet. Very hardy, grows in sun or shade. Yellow flowers in June, followed by bright orange and scarlet berries in fall and winter. Easy to grow. Price: 25c each; 3 for 70c.
2803 Boston Ivy. Small-leaved variety. One of the finest hardy climbers. Clings firmly to smooth surfaces. Makes a wall of green that changes in fall to bright crimson and yellow. Does not have to be tied. Price: 35c each.
2804 Dutchman's Pipe. A truly remarkable vine. Large, heart-shaped leaves. Makes a very dense screen of foliage. Thrifty grower and hardy. Brownish flowers are pipe shaped. Leaves have a shingle-like arrangement. Does best on north side of house. Price: 45c each.
2805 Engelmann's Ivy. Clings to walls and trees by means of tendrils like the Boston Ivy. Foliage resembles the Virginia Creeper, but is smaller and denser. The hardest of all. Price: 25c each; 3 for 70c.
2806 Trumpet Vine. A hardy native vine. Robust grower. Trumpet-shaped, orange scarlet flowers. Light green leaves. Price: 25c each; 3 for 70c.
2807 Wisteria (Purple). A very handsome climber. Attractive foliage. Flowers are borne in magnificent purple clusters. Exceptionally desirable for porches, pergolas and trellises. Price: 35c each.
2808 Honeysuckle (Scarlet Trumpet). Rapid grower. Excellent vining qualities. Fragrant flowers. Will thrive in shady places. Price: 35c each.

CLEMATIS

- The most beautiful of all climbing plants. Need good rich, deep soil, good drainage. Plant crowns 3 inches below surface.
2809 Large Flowering Henryi. Creamy white flowers. 2-year plants. Price: 75c.
2810 Large Flowering Jackmani. Velvety violet purple. 2-year plants. Price: 75c.
2811 Small Flowering Paniculata. Sweet-scented Japan; white flowers. Blooms in September. 2-year. Price: 35c.

Carefully Selected Planting Stock

3100 Almond, Pink Flowering. Pretty dwarf bushes that produce small pink flowers. 18-24 inches. Price, 39c each; 3 for 99c.

- 3101 Almond White Flowering.** Same as above except flowers are white. 18-24 inches. Price same as above.
3103 Althea (Rose of Sharon). Practically everblooming. Large flowers in red, white or purple. 18-24 inches. Price, 29c each; 4 for 99c.

BARBERRY

- 3102 Barberry Thunbergi (Japanese).** Has glossy, green foliage changing to coppery red in the fall. Attractive yellow blossoms and little red berries which hang on all winter. 2 ft., 25c each, 10 for \$1.90. 1 ft., \$4.90 per 100.
3104 New Red Leaved Japanese. Similar in all respects to the green leaved variety except the foliage is a rich lustrous bronze red, becoming more and more brilliant as time goes on until it changes to a vivid orange in the fall. 12-18 inches. 29c each; 4 for 99c. 18-24, 39c each; 3 for 99c.
3105 Calycanthus. Flowers very double, of a purplish brown color and very fragrant. Sometimes called "Sweet Scented Shrub." Blooms most all summer. 18-24 in., 39c each; 3 for 99c.
3106 Cydonia Japonica (Japan Quince). Called Firebush because when it is in full bloom it is just like a blaze of fire. Very hardy, has little thorns on; about 6 foot. 18-24 in., 29c each; 4 for 99c.

DEUTZIA

- 3112 Rosea.** Single pink. Blooms in June. Very generally grown.
3113 Pride of Rochester. Is tall. Growing higher than ones head. Pure white flowers. 18 to 24 inches. Price, 29c each; 4 for 99c.

DOGWOOD

- 3121 Cornus Sibirica.** This has a real bright red bark. Foliage is dark green, flowers creamy white. Postpaid, 18 to 24 inches. 25c each; 5 for 99c.
3123 Yellow Barked. Same as Cornus except for the bark which is yellow. Plant some of both. Price same as above.
3124 Variegated. Purplish red branches. Silver variegated foliage. Excellent for mass planting in ornamental landscape jobs. 18 to 24. 29c each; 4 for 99c.

ELDER

- 3130 Golden.** Has a green background. It is one of the very finest of golden

Tree Hydrangea

- leaved shrubs. 18 to 24 in., 25c each; 5 for 99c.
3131 Cut Leaved. Leaves are deeply cut which gives it a beautiful fernlike appearance. Grows 6 to 8 ft tall. Price same as above.
3133 Forsythia (Golden Bell). Earliest shrubs to bloom. Covered with golden yellow bell shaped flowers before the leaves. 18 to 24 in., 29c each; 4 for 99c.
3135 High Bush Cranberry. Similar to the Snowball, but bloom is more open and spreading and is followed by cluster of scarlet fruit like cranberries. Postpaid, 18 to 24 in., 39c each; 3 for 99c.

HYDRANGEAS

- 3140 Paniculata Grandiflora.** Blooms in August. Flowers immense cone shaped trusses. Best results are obtained in partial shade. 18 to 24 inches.
3141 Arborescens Grandiflora. Flowers like snowballs, pure white, except larger. 18 to 24 in. Price, 29c each; 4 for 99c.
3142 Tree Hydrangeas. This the Paniculata Grandiflora with its beauty of great clusters of blooms, in tree shape. 2 to 3 ft., 69c each; 3 for \$1.99.

BUSH HONEYSUCKLE

- 3150 Tartarian.** Old favorite Bush Honeysuckle. Blooms in May and June, berries bright red. Can furnish Red, white and pink. 18 to 24 in., 29c each; 4 for 99c.
3151 Fragrantissima. Has delightful fragrance. Flowers white, fruit scarlet. Blooms from March until April. Price same as above.

LILACS

- 3160 Common or Old Purple.** This the old fashioned, well known variety that will always keep its popularity. 18 to 24 inches. 25c each; 5 for 99c.
3161 Common White. The most popular white variety. 18 to 24 inches. Price, 29c each; 4 for 99c.
3162 Persian Purple. Blooms more freely than the common lilac and has smaller leaves. 18 to 24 inches. Price same as above.

MOCK ORANGE (SYRINGA)

- 3170 Lemoine.** Dwarf habit. Flowers large semi-double and very fine. 18 to 24 in.
3171 Coronarius. A hardy free-flowering shrub with showy fragrant flowers. Grow 8 to 10 feet. Price, 25c each; 5 for 99c.
3172 Virginal. Grows tall in compact bushy form, flowers large and handsome, almost a perpetual bloomer. Price, 29c each; 4 for 99c.

SNOWBALL (VIBURNUM)

- 3180 Dentatum (Arrowhead).** Has bright green, heart shaped leaves, turning to purple and red. Flowers white. 18 to 24 inch. Price, 29c each; 4 for 99c.
3181 Lantana (Wayfaring tree). Has beautiful wrinkled, crinkled leaves. Blooms in May and June, flowers white. Grows 10 to 12 feet. Perfect hardy.
3182 Common Snowball. Grows 8 to 10 feet. Great clusters of snowy white globes of flowers in May. Price above two, 39c each; 3 for 99c.
3190 Snowberry White. A fine ornamental shrub, very hardy, clusters of waxy white berries. 18 to 24 inches. 25c each; 5 for 99c.
3191 Snowberry Red. Has small red berries. 18 to 24 in., 25c each; 5 for 99c.

SPIREA

- 3200 Anthony Waterer.** Very compact and low growing. Flowers dark crimson pink. 18 to 24 inches.
3205 Billiard. Grows 4 to 5 feet high. Blooms, July and August. Rich pink flowers. 18 to 24 inches.
3202 Freebell. Another beautiful red variety. A strong grower. Fine for borders and planting along foundations. 18 to 24 inches. Price above three, 25c each; 5 for 99c.
3201 Callosa Alba. Same as Anthony Waterer except the blooms are white. 18 to 24 inches. Price, 29c each; 4 for 99c.
3203 Thunbergi. Most beautiful of all. Foliage quite fine. Almost yellow. Grows 3 to 4 feet. 18 to 24 inches. 25c each; 5 for 99c.
3204 Van Houtte. So-called Bridal Wreath. Fountain of white by decoration day. Grows 5 to 6 feet high. 12 to 18 in., 100 for \$4.99; 18 to 24 in., 10 for \$1.20.
3210 Tamarix. Extremely hardy and drought resisting. Feathery plumelike foliage. Flowers pink. 18 to 24 inches. Price, 25c each; 5 for 99c.

WEIGELA

- 3220 Candida.** Pure white flowers. 18 to 24.
3221 Eva Rathke. Most free blooming of the Weigelas. Blooms are a dark red. Dwarf habit. 18 to 24 inches. Price on above two, 29c each; 4 for 99c.
3222 Rosa. Hardest of all the Weigelas. Blooms freely. Flowers are rose colored. 18 to 24 inches. 25c each; 5 for 99c.

PRIVET

- 3230 Amoor River.** The hardy type adapted to cold places. Retain green leaves in fall. 2 ft., 10 for \$1.40. 1½ ft., 100 for \$4.99.
3231 California. The low spreading form. The autumn foliage very attractive. 2 ft., 10 for \$1.25.

FLOWERING PLUM

- 3233 Purple Leaved (Prunus Newport).** A new hardy purple leaved flowering plum. We have the genuine stock of Prunus Newport. 2 to 3 ft., 39c; 3 to 4 ft., 59c.
3234 Double Flowering Plum (Prunus Triloba). Double flower. Early in the spring before leaves appear the whole tree is covered with fleecy clouds of beautiful, double, pink blossoms, on the long slender branches. A semi-dwarf grower. Hardy everywhere. 2 to 3 ft., 39c each; 3 to 4 ft., 59c.

SUMAC

- 3235 Staghorn Sumac (Typhina).** Picturesque and rugged. Flowers during June and July in dense terminal panicles, followed by impressive red fruits. Velvety branches. 18 to 24 inches, 29c each; 2 to 3 ft., 39c each.

BERRY'S SMALL FRUIT

Mastodon Strawberry Plants

**Wonderful, Newly
Developed Strain.
Get the Genuine.
Nationally Adver-
tised Mastodon.
Here it is.**

3430 Mastodon. The wonderful new Everbearing Strawberry. Enough cannot be said for it. Under ordinary field culture it has produced at the rate of 350-16-quart crates per acre the same year it was planted. Its great size and luscious flavor are greatly in its favor for the market. It will bring far better prices than the older everbearers because of its beauty and enormous size. It is unapproachable; you should start your Mastodon bed at once—it will reap fine profits for you. Postpaid, 50 plants, \$1.35; 100, \$2.45; 200, \$4.00; 500, \$8.75; 1,000, \$14.95.

Senator Dunlap

ers. Self fertilizing. It is a berry that is hard to equal. Postpaid, 50 plants, 90c; 100, \$1.65; 200, \$3.00; 500, \$6.75; 1,000, \$12.95.

3425 Champion Everbearing. Big Berries, rich in flavor and produced in great abundance. Long roots, good drought resister and a heavy yielder. In some respects superior to the Progressive. Tested and proven a remarkable kind. Price same as Progressive.

Spring Bearing Plants

3400 Senator Dunlap. A favorite where ever tried. There are a few kinds a trifle earlier but they do not produce such fine fruit. It is early. The fruit is large. Color is a deep, rich red. It has the most delicious, sprightly flavor. Plant will withstand a lot of hardness. It is highly productive. The berry is a good keeper and an excellent variety for commercial gardeners. Self pollinizing.

3405 Gibson. Medium late. Berries large, beautiful dark red in color, vigorous grower and very productive. Bears through a long season, grows well almost anywhere. Not a shipping berry, but its high quality makes it very good for home garden or local market.

3410 Dr. Burrill (The Million Dollar Strawberry). You, no doubt, have heard of this famous variety. It is without question a wonderful berry. Vigorous growing, drought resisting, and long rooted. A little later than the Dunlaps. Large, delicious dark red berries. A "Perfect" variety. Postpaid on above three, 50 plants, 60c; 100, \$1.00; 200, \$1.75; 500, \$2.50; 1,000, \$4.50.

3415 Red Gold. Red Gold is a revelation in spring varieties. Enormous size. Some measure eight inches around. Color is shining red. They do not contain the acid found in common varieties. Require less sugar, excellent for preserving. Fruiting season thirty days. Postpaid, 12 plants, 90c; 25, \$1.75; 50, \$2.90; 100, \$4.50.

3416 The Blakemore. Variety developed by U. S. Department of Agriculture. It is considered by far the best, commercial variety. Try this new berry. Postpaid, 50 plants, 90c; 100, \$1.75.

Blackberries

3700 Eldorado. Hardy berries are large, jet black, in large clusters.

3701 Early Harvest. The earliest variety. Fruit rather small and sweet. Not recommended for the North, but does well in Missouri, Kansas, Southern Iowa etc. It is an old standby.

3702 Snyder. The old standby. Very hardy, thrifty and vigorous growing. Berries are borne in large quantities. Postpaid, 25 or less, 5c each; 100, \$2.95.

Raspberries—Red

3725 Latham. Red. An extra hardy red raspberry from Minnesota. Extra good.

3726 St. Regis or Everbearing Red. Brilliant crimson, good size, ripens early; produces until frost.

3727 Cuthbert. Red. One of the old standbys. Sweet and very rich. Postpaid, 25 or less, 5c each; 100, \$2.95.

Raspberries—Black

Cumberland

3750 Cumberland. Is the best known of all the black caps; a strong grower, heavy bearer and of excellent quality.

3751 Kansas. Earlier than the Cumberland. Large jet black berries. Heavy cropper a great table berry. Moderately juicy, good flavor.

3752 Plum Farmer. Moderately large berries, jet black and quality excellent. Fine for eating, canning and marketing. Vigorous grower, good yielder. Postpaid prices. Strong Transplants. 25 or less, 8c each; 100, \$1.95. Tips 100, \$2.95.

Currants

3765 Cherry. It is a very deep red, large, rather acid, but fine for jelly.

3766 Fays Prolific. Is not so red, bunches very large; is very productive.

3767 Improved Perfection. Is a cross between Fays Prolific and White Grape, a beautiful bright red.

3768 White Grape. The best of the white varieties.

Gooseberries

3770 Downing. Is a more compact grower, berries green and very large; for dessert and canning.

3771 Houghton. Is the strongest grower, a good annual bearer, fruit of fair size. Postpaid, Gooseberries and Currants same price. 25c each; 10, \$1.90; 100, \$12.00.

Miscellaneous Roots and Plants

ASPARAGUS ROOTS

Washington Rust Proof. Heavy bearing, produces large and tender shoots. Postpaid, 1 Yr. 100 roots, 90c; 2 year 100 for \$1.65.

630 Rhubarb Roots. Spring tonic, once planted lives a lifetime. Postpaid, 10 for 75c; 25, \$1.45.

HORSE RADISH ROOTS

631 Crowns. Grind roots for relish. Postpaid, 10 for 60c; 100, \$1.45.

632 Cuttings. 10 for 40c; 100, \$1.45.

633 Sage Plants. Broad leaf, used for seasoning. 2 Yr. Postpaid, 10 for 95c; 100, \$8.00.

ORCHARD and FRUIT TREE

SPECIALS

HIGHEST QUALITY NORTHERN GROWN STOCK

Name Nearest Express Office

Our Fruit Trees are extra selected stock. Grown only 25 minutes' drive from our Seed House. Hundreds of acres of all kinds of nursery stock to select from and under Supervision of Horticulturists from the State Department that makes the stock you buy free from disease; and another feature: your nursery stock does not make two or three trips before you get it.

GUARANTEE

We guarantee that our stock will reach the purchaser alive and in a growing condition.

SIZES

We offer all our fruit trees in two sizes. The mail size are 1-year trees on 2-year roots, 3 to 4 feet. The express are 2-year-old trees on 3-year-old roots, and are 4 to 5 feet high.

Summer Apples

- 3500 Red June.** Early bearer, hardy. Red. Medium size. High flavor.
- 3501 Yellow Transparent.** Flesh white, juicy and fine grained. Very fragrant when fully ripe. Fine for eating or table. Ripens in August.
- 3502 Duchess.** Early, very hardy, red striped, juicy, the very best quality for cooking.
- 3503 Maiden Blush.** A large apple with a beautiful blush on side. A pleasant sub-acid flavor and a valuable apple.

Fall or Autumn Apples

- 3505 Fameuse or Snow.** Flesh snow-white, crisp. Has an excellent flavor, ripens in November. Will keep up into January.
- 3506 Wealthy.** Best of all fall apples. Striped bright red and a wonderful quality. Ripens between the Jonathan and Duchess.

Winter Apples

- 3510 Delicious.** This apple commands the highest price in the market. Fine grained, crisp and juicy, sweet slightly touched with acid. Equal to the best. The best eating apple.
- 3511 Grimes Golden.** Early annual bearer. Yellow, crisp, spicy, sub-acid.
- 3512 Jonathan.** A red apple; fine for winter. Tender and juicy.
- 3513 Staymen Winesap.** Dark rich red; flesh firm and crisp. Exceedingly juicy and tender. Bears young.
- 3514 Ben Davis.** Fruit large size, red striped, good keeper.
- 3515 Gano or Black Ben Davis.** Fruit dark red, a good variety, fine cooking.
- 3516 Mammoth Black Twig.** A large red apple, considered superior to Winesap.
- 3517 Romanstem.** Color yellow. Excellent for eating or cooking.
- 3518 Tolman Sweet.** Valuable apple for baking. Will keep until April.
- 3519 Northwestern Greening.** Long keeper, very hardy, fruit extremely large.

Crab Apples

- 3520 Red Siberian.** Small. Used for jelly and pickles. Showy red; vigorous and hardy. August to September.
- 3521 Whitney Crab.** A rapid grower, hardy. Medium size. Yellow, striped with red, very juicy and fine grained. Flavor rich, almost sweet.

Peaches

- 3574 Champion.** Very hardy. Creamy white skin, red cheeks; freestone. Ripens about two weeks before the Elberta.
- 3575 Crawford's Early (Freestone).** Best early market. Fruit very large. Color yellow, juicy and fine flavored.
- 3576 Elberta.** The great market peach of the Southwest. Very large, yellow with red cheek.
- 3577 J. H. Hale.** Like Elberta, but earlier.
- 3578 Heath Cling.** Large creamy white. Excellent quality. Good keeper.

\$100 *a* YEAR for LIFE!

*Give This
House a
Name!*

ANY SIMPLE NAME MAY WIN

This is a new style, true American type home that is meeting with great popularity. We are desirous of obtaining a suitable name for it for use in connection with a building program. We will pay you \$100.00 A YEAR FOR LIFE if you suggest the most suitable name. There are no strings tied to this offer. Sending us a name for this house does not obligate you in any way. Nothing to buy or sell. We merely want a suitable name and are willing to pay \$100.00 A YEAR FOR LIFE for the best name sent us. Think of it, \$100.00 this year and each and every year for the balance of your natural life. A steady, guaranteed cash income. Surely, you can think of an appropriate name for such a beautiful house. Do not use more than two words. Any word or words may be used or any combination of words such as "Parklawn", "Cozynook", "Heart-home" or names like "Sunshine Inn." "Rest Haven", etc. No matter how simple your suggestion is send it in at once. Any name may win. Possibly the most suitable name has already flashed into your mind. If it has—send it in at once and \$100.00 cash this year and each and every year for the rest of your life is yours FREE.

NOTHING ELSE REQUIRED—RUSH NAME TODAY

Positively nothing else is required of you to win \$100.00 cash now and \$100.00 cash each and every year for life—just suggest the most suitable name—that's all. This offer is open to every one excepting members of this firm, its employees and relatives. Each participant may send only one name. Sending two or more names will cause all names submitted by that person to be thrown out. Contest closes April 30, 1932. Should two or more persons submit equally suitable names for this house the full amount of the prize offered will be paid to each one so tying. And the \$100.00 cash for promptness also will be paid to each winner providing suggestion is mailed within three (3) days after this announcement is read.

CALIFORNIA LADY GETS \$100 A YEAR FOR LIFE

We just recently paid Mrs. Allia Francis, Route 6, Box 439, Bakersfield, California, \$100.00 and put her on our books to receive \$100.00 EACH AND EVERY YEAR FOR THE REST OF HER LIFE for sending us the most suitable name for a house. You may be the next. You risk nothing. It costs you nothing. Just think how nice it would be to receive \$100.00 each year for the rest of your life. Maybe you have the most suitable name right on the tip of your tongue this minute. Don't delay sending it in.

\$100 EXTRA FOR PROMPTNESS

We want a suitable name for this house real quickly, and will pay the winner an extra \$100.00 just for PROMPTNESS providing suggestion is sent within three (3) days after this announcement is read. Rush your suggestion TODAY—QUICK. The very name you have in mind may bring you a permanent cash income of \$100.00 A YEAR FOR LIFE and \$100 extra besides for promptness in sending it in.

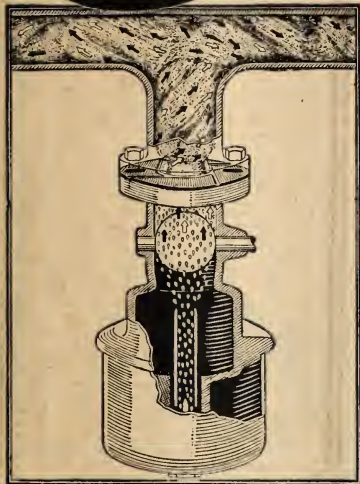

ANY NAME MAY WIN

Rush your suggestion TODAY regardless of what it is. Any easy, simple name may win. \$100.00 each and every year for life and \$100.00 cash for PROMPTNESS may be yours if you hurry. A postal card will do. Just say, "I suggest
.....
as a name for your beautiful house."

51 MILES ON A GALLON OF GAS WINS ECONOMY CONTEST

49 MILES Takes 2nd Place

How Whirlwinds Save Gasoline

The principle of the Whirlwind is to slightly compress the partly vaporized gasoline as it passes thru the raised venturi. Extra air enters from four air inlets at such a tangent as to pick up the unvaporized gasoline particles, whirling them into action.

The turbulence created breaks them into a vaporized gas, giving better, smoother power, quicker starting, cutting gasoline waste and carbon formation.

The Whirlwind on my 1930 Chevrolet works splendidly writes Henry Bomberger. I have more speed, more pulling power, and increased my gasoline mileage considerably. Hills I used to take in second gear I now make in high. Anton Wetsch says I wouldn't take the Whirlwind off my car for any amount of money. I am certainly convinced of the large savings it gives. My gas mileage has increased greatly since installing the Whirlwind says W. B. Fountain. My car has plenty of pick up and starts like a whip.

SALESMEN AND DISTRIBUTORS WANTED To Make Up To \$100.00 A Week

Whirlwind men are making big profits taking care of local business for this fast selling device that car owners cannot afford to be without. Good territory is still open. Free sample offer to workers. Full particulars sent on request. Just check the coupon.

WHIRLWIND MFG. COMPANY
Dept. 132, Station C Milwaukee, Wis.

Winning Cars Equipped With WHIRLWIND GAS SAVERS

Automobile owners who have been worrying about gasoline expense will be interested in an amazing test recently conducted by a Texas Motor Car Company. Twenty-three cars were entered in a mileage economy test, the winning car running 51 miles on a gallon of gas, the second car 49 miles on a gallon. When official test records were published it was found the two winning cars were both equipped with Whirlwind gas savers.

"Peak" Contest Mileages

A Test On Your Car

The amazing results obtained in this mileage contest are naturally greater than those obtained in ordinary driving. Careful throttling, most economical speeds—no traffic hold-ups—and no waste of power thru quick stops, help to bring about these "peak" mileages.

More power, faster pick-up, less carbon, quick starting, and increased mileage is what users say in telling of their experience with the Whirlwind. Every motorist owes it to himself to test the Whirlwind to prove the results on his own car.

Fits All Cars

In just a few minutes the Whirlwind can be installed on any make of car, truck or tractor. It's actually less work than changing your oil or putting water in the battery. No drilling, tapping or changes of any kind necessary. It is guaranteed to work perfectly on any make of car, truck or tractor, large or small, new model or old model. The more you drive the more you save.

GUARANTEE

Mrs. C. P. Blalock, mileage contest winner

While we do not claim to produce 49 to 51 miles on your car, we do guarantee that the Whirlwind will save its cost within 30 days or the trial will cost you nothing. We invite you to test it at our risk. You are to be the sole judge.

FREE OFFER COUPON

WHIRLWIND MANUFACTURING CO.,
Dept. 132, Station C, Milwaukee, Wis.

Gentlemen: You may send me full particulars of your Whirlwind Carbureting device and tell me how I can get one Free. This does not obligate me in any way whatever.

BERRY'S BLUE RIBBON COLLECTIONS

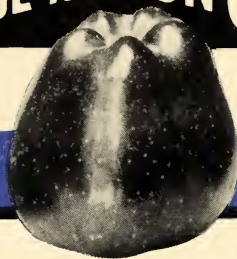

CHERRY COLLECTION.

This is a collection that nearly everyone should have. It consists of

3 Fine Early Richmond, 2

Montmorency, and 1 of the big English Morello. They are the kinds the people want. They are all excellent. Having an assortment gives you slightly different types of fruit and they are not all ripe at the same time. This famous Cherry collection is exceedingly popular. You can't go wrong in selecting what thousands are buying. This is an extra value bargain.

Six Fine Trees 1-yr. stock on 2 yr. roots, postpaid for \$1.49. Two collections for \$2.79.

APPLE COLLECTION.

A Splendid Bargain—A Popular Favorite. This is a dandy. 1 Maiden Blush, 1 Yellow Transparent, 1 Wealthy, 1 Ben Davis, 2 Junes, 2 Delicious, 2 Grimes Golden. Those are the famous favorites of today. An assortment or two like this on a place adds much to its value. People want apples and they want good ones. Plant these assortments and you play safe. This is all high grade stock. We know our customers want this quality. That's what makes satisfaction. It's a real bargain offer.

10 Fine Selected Trees 1-yr. stock on 2-yr. roots, postpaid for \$1.69. Two collections or 20 trees, for \$3.20.

PEACH COLLECTION.

You save 30 per cent in ordering this assortment. This wonder-value consists of 2 Elberta, 2 J. H. Hale, 2 Crawford, 1 Champion, 1 Cling Peach. All standard varieties of unquestionable merit. These trees carefully selected from our special stock and guaranteed to please you. These eight trees, if bought separately would cost you \$2.10, while most firms will charge you even more. You will find the quality better than the average. It is easier to have fine Peaches when you plant these better trees.

8 Hardy 1-yr. trees on 2-yr. roots postpaid for \$1.29. Two collections delivered for only \$2.39.

PLUM COLLECTION.

A great combination in plums. Plums often bear two years after planting. These trees can be set where most trees would not thrive. Plums are wonderful for canning and jelly. Try this collection. It is an exceptional value. Perhaps you may have a neighbor who would join you in ordering some of these collections.

6 Fine Trees 1-yr. stock on 2-yr. roots, 2 Waneta, 2 Terry, 1 Sapa and 1 Underwood, postpaid for \$1.65. Two collections for \$3.15.

GRAPE COLLECTION

No. 1. Ten 1-yr. vines postpaid for 89c. Collection No. 2. Ten 2-yr. vines postpaid for \$1.39. Both collections consist of 2 Moore's Early, 2 Niagara, 2 Agawam, and 2 Concord. The choicest stock is used in both. Either will give excellent satisfaction. Takes a year longer, of course, to get results from 1 year stock. We can make these extremely low prices by assembling these collections in advance. You save 25% to 30% in this way.

You get a pleasing variety of good hardy vines. You'll be delighted with this quality.

A VEGETABLE GARDEN CUTS YOUR COST OF LIVING

GRIMM ALFALFA SPECIAL

LOT BED ROCK

**Priced
Extremely Low**

**U. S. Verified
Origin Seed
Hardy, Northern
Grown Grimm**

**\$8.40
PER
BU.**

We have been extensive buyers of Grimm Alfalfa seed this past fall. Prices were low. We know our customers more and more want Grimm. Our purchases were made to protect your interests. Now you can buy Grimm Alfalfa seed from us at the lowest prices in all history.

Our Grimm has been secured from the states of Idaho, Montana, and Dakota. Nearly every Alfalfa grower knows that the hardiest of all Alfalfa comes from these states. Grimm Alfalfa from these states is the hardiest obtainable.

A Special Value

Naturally when buying large quantities of seed, all lots are not equally nice in appearance. Some lots contained a little off colored seed. In some the berries were smaller. It was all good serviceable seed. High purity, no noxious weeds. Good germination but not as uniform in appearance.

Instead of mixing all this seed into one grade as so many seedsmen do we kept these lots separate and blended them into one good uniform lot. We are pricing this lot so ridiculously low that it certainly deserves the name of Bed-Rock.

Never before have you been able to buy genuine Grimm Alfalfa at so low a price. It's lower than good Common Alfalfa sold for last year. It is unquestionably a most outstanding bargain at this exceedingly low price. Good clean serviceable seed. You will find it very dependable.

Good Dependable Seed

Experienced Alfalfa growers know that Alfalfa seed can be considerably off colored and still give most satisfactory results. Many customers have told us that they secured better results from this grade of ours than they did from much higher priced seed purchased elsewhere.

We have had our own buyers in the states of Idaho, Montana and Dakota. They know the fields and the growers. They know this seed is the true Grimm. This seed is U. S. Verified Origin seed. Those wishing state sealed and certified seed will find an outstanding value in Lot Gold Seal on page 28 of this 1932 catalog. Lot Bed-Rock, however, is the lowest priced lot of Grimm obtainable and we guarantee it the greatest money saving opportunity in Grimm Alfalfa for the spring of 1932.

LOT JUST-RITE RED CLOVER

**\$8.70
PER
BU.**

A Super Bargain

**Containing 25% to 30% Grimm Alfalfa
60 lbs. per bu. Bags Free**

This sensational value is in great demand. This is fine quality hardy Red Clover seed fully equal to Lot Leader, a sample of which is enclosed. This seed became mixed with some Grimm Alfalfa seed. We can't sell it as pure Red Clover or pure Grimm, but must sell it out as a mixture at a reduced price. Counting in the Alfalfa seed, this seed tests better than 98% pure, and 91% germination. Guaranteed to be satisfactory in every way. It is priced so low and tests so high that it makes a most remarkable value. You can't equal it at the price.

Gives Highly Satisfactory Results

Thousands of farmers are mixing Alfalfa with Red Clover in order to put their land in shape for a full seeding of Alfalfa later. This method is giving great success. The Alfalfa with Red Clover often does better to start with when mixed with Clover than when sown alone. This plan of seeding is sweeping the nation. It is highly profitable and we recommend it without reserve. Gives a good seeding of Red Clover with plenty of genuine Grimm Alfalfa to establish that crop on your land. Lot Just-Rite will satisfy you and save you a lot of money.

This seed is of the hardiest type, free of noxious weed seeds. Because it is mixed you can buy it for less money than you can buy either the Red Clover or the Grimm Alfalfa separately. This is a very practical seeding. It is a most economical one. Every farmer can afford to sow Clover when such seed can be secured at so low a price. Send your orders for this lot as early as possible as the supply is limited.
